Latest VAERS Data Show Vaccine Injury Trends Continue, CDC Fails to Respond to The Defender's Inquiries

VAERS data released today showed 56,869 reports of adverse events following COVID vaccines, including 2,342 deaths and 7,971 serious injuries between Dec. 14, 2020 and April 1, 2021.

VAERS is the primary mechanism for reporting adverse vaccine reactions in the U.S. Reports submitted to VAERS require further investigation before a causal relationship can be confirmed.

Every Friday, [VAERS](#) makes public all vaccine injury reports received to the system for the previous week. Today's data show that between Dec. 14, 2020 and April 1, a total of [56,869 total adverse events](#) were reported to VAERS, including [2,342 deaths](#) — an increase of 93 over the previous week — and [7,971 serious injuries](#), up 245 over the same time period.

From the 4/1/2021 release of VAERS data:

Found 56,869 cases where Vaccine is COVID19

Table

 Event Outcome	 Count	 Percent
Death	2,342	4.12%
Permanent Disability	941	1.65%
Office Visit	8,743	15.37%
Emergency Room	29	0.05%
Emergency Doctor/Room	8,946	15.73%
Hospitalized	4,961	8.72%
Hospitalized, Prolonged	11	0.02%
Recovered	21,678	38.12%
Birth Defect	57	0.1%
Life Threatening	1,484	2.61%
Not Serious	20,950	36.84%
TOTAL	† 70,142	† 123.34%
† Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 56869 (the number of cases found), and the Total Percentage is greater than 100.		

Of the 2,342 deaths reported as of April 1, [28% occurred](#) within 48 hours of vaccination, 19% occurred within 24 hours and [42% occurred](#) in people who became ill [within 48 hours](#) of being vaccinated.

Ask Congress to Investigate COVID Origins - Take Action

In the U.S., [153.6 million](#) COVID vaccine doses had been administered as of April 1. This [includes](#) 71.3 million doses of Moderna's vaccine, 78.2 million doses of Pfizer and 3.4 million doses of the Johnson and Johnson's (J&J) COVID vaccine.

This week's VAERS data show:

- 19% of deaths were related to cardiac disorders.

55% of deaths were related to neurological disorders, 42% of deaths were related to respiratory disorders, and 31% of deaths were related to gastrointestinal disorders.

We use cookies to ensure that we give you the best experience on our website. You consent to our cookies if you continue to use our website.

Ok Privacy policy

- As of April 1, [379 pregnant women](#) had reported adverse events related to COVID vaccines, including 110 reports of [miscarriage or premature birth](#).
- Of the [620 cases of Bell's Palsy reported](#), 61% of cases were reported after [Pfizer-BioNTech](#) vaccinations — almost twice as many as reported (37%) following vaccination with the Moderna vaccine. Fifteen cases (2%) of Bell's Palsy were reported with J&J.
- There were [72 reports of Guillain-Barré Syndrome](#) with 57% of cases attributed to Pfizer, 43% to Moderna and 6% to J&J's COVID vaccine.
- There were [16,876 reports of anaphylaxis](#) with 50% of cases attributed to [Pfizer's COVID vaccine](#), 44% to [Moderna](#) and 7% to [J&J](#) vaccine.

According to the [CDC's website](#), "the CDC follows up on any report of death to request additional information and learn more about what occurred and to determine whether the death was a result of the vaccine or unrelated."

On March 8, [The Defender](#) contacted the CDC with questions about reported deaths and injuries related to COVID vaccines. We provided a written list of questions about how the CDC conducts investigations into reported deaths, the status of investigations on deaths reported in the media, if autopsies are being done and the standard for determining whether an injury is causally connected to a vaccine.

We also inquired about whether healthcare providers are reporting all injuries and deaths that might be connected to the COVID vaccine, and what education initiatives are in place to encourage and facilitate proper and accurate reporting.

Twenty-two days later a representative from the CDC's Vaccine Task Force responded by saying the agency had never received our questions — even though the employees we talked to several times said their press officers were working through the questions we sent. We provided the questions again and requested a response by April 7. To date, the CDC has not responded despite our repeated follow-up attempts.

Update on investigation into death of Florida doctor after Pfizer vaccine

As [The Defender reported today](#), Florida health officials [said Thursday](#) their joint investigation with the CDC into the death of 56-year-old Dr. Gregory Michael confirmed Michael's death was caused by immune thrombocytopenia, a [blood disorder caused by an immune reaction](#).

Michael developed symptoms of the disorder three days after receiving his first dose of the Pfizer COVID vaccine, and died 12 days after that.

An official with the Florida Department of Health said investigators could not determine with "medical certainty" if there was a link between the vaccine and Michael's death, leading them to conclude the doctor died of natural causes.

Teen diagnosed with Guillain-Barré weeks after first COVID vaccine

On April 6, [The Defender reported](#) that a Texas teenager was hospitalized and diagnosed with Guillain-Barré syndrome a few weeks after his first dose of the COVID-19 vaccine. News reports didn't disclose which [COVID vaccine](#) the teen received.

According to the [National Institute of Health](#), one case of GBS [was reported](#) in February in an 82-year-old woman who had one dose of [Pfizer's COVID vaccine](#), though current VAERS data show 72 cases of GBS have been reported between Dec.14, 2020 and April 1, 2021.

Johnson & Johnson vaccination sites shut down after 29 adverse reactions

On April 8, [The Defender reported](#) that a mass vaccination site in Colorado was shut down and 600 people with appointments turned away after 11 people experienced reactions. Two people were transferred to the hospital after medical staff determined they required additional observation.

Officials did not specify what reactions were observed or their severity, but said side effects were "consistent with what's expected."

As [The Defender reported](#) April 9, health officials on Thursday [paused](#) COVID vaccinations at a Wake County, North Carolina, site after 18 people experienced adverse reactions, including four people who were transferred to the hospital after being vaccinated with J&J's vaccine.

The CDC said it is aware of adverse reactions in some people who received J&J's COVID vaccine in Iowa, Colorado, Georgia and North Carolina, but found no reason for concern.

COVID vaccine breakthrough cases

On April 6, [The Defender reported](#) that 246 Michigan residents fully vaccinated against COVID were later diagnosed with the virus, resulting in three deaths.

All "breakthrough cases" occurred between Jan. 1 and March 31 in people who tested positive 14 or more days after the last dose in the vaccine series. Of the 117 with hospitalization data entered, 11 were hospitalized, 103 were not hospitalized and three were reported as unknown.

The three people who died were all 65 or older and two "were within three weeks of completion of vaccination."

On April 8, [Kaiser Health News reported](#) that a man died at age 36 of coronavirus, just days after getting his first dose of COVID vaccine. Espinoza fell ill a few days after his first dose on Jan. 5, but went to work thinking it was vaccine-related. His symptoms progressed to a fever and chills and he tested positive for COVID five days later. Three weeks later Espinoza had passed away.

"Even after you're fully vaccinated, there still is a remaining risk," said Horton, co-author of a letter to [the New England Journal of Medicine](#) about post-vaccination infection rates among healthcare workers in California. "Even if it's so much lower, it's still present."

On April 6, a senior official from the European Medicines Agency (EMA) said there was a “clear” link between the Oxford-AstraZeneca COVID vaccine and a rare blood clotting syndrome, [The Defender Reported](#).

Marco Cavaleri, the EMA’s head of vaccines, [told](#) Italy’s Il Messaggero newspaper that in his opinion, “it is clear there is a link with the vaccine, but we still do not know what causes this reaction.” But hours later [the EMA denied](#) having already established a causal connection between the vaccine and blood clots.

In a statement to Agence France-Presse, [the EMA said](#) it had “not yet reached a conclusion and the review is currently ongoing,” adding it expected to announce its findings on Wednesday or Thursday.

As [The Defender reported](#) on April 7, European regulators confirmed a “possible link” between AstraZeneca’s COVID vaccine and “[very rare](#)” blood clots, but concluded the benefits of the vaccine still outweigh the risks.

The EMA did not recommend restricting use of the vaccine based on age, gender or other risk factors, but did say cases of blood clotting after vaccination “should be” listed as a possible side effect.

The UK’s vaccine regulator, the [Medicines and Healthcare products Regulatory Agency](#) said the evidence of a link between AstraZeneca’s vaccine and blood clots was strong, but more research was needed.

[Britain’s Joint Committee on Vaccination and Immunization](#), which advises UK health departments on immunization, said “where possible” the vaccine should not be given to adults under 30.

The EMA said Wednesday during a [press conference](#) it is also looking carefully at the [J&J vaccine](#), as three cases of blood clots associated with low platelets, similar to the cases reported after AstraZeneca vaccines, have been reported, as well as one instance of [thrombosis in a clinical trial](#).

On April 8, [Bloomberg reported](#) the Australian government was guiding against giving AstraZeneca COVID vaccine to people under the age of 50 after the EMA found a possible link between the vaccine and rare blood clotting issues. Chief Medical Officer Paul Kelly said the government now preferred the Pfizer vaccine for the under 50s.

[Children’s Health Defense](#) asks anyone who has experienced an adverse reaction, to any vaccine, to file a report following [these three steps](#).

Does the public know that the "virus" kills less than 1% of those under age 70? Does the public know that a "virus" that kills less than 1% of those under age 70 is not a "pandemic"? Does the public know that there are proven therapies for people who have the disease? Does the public know that the vaccines are experimental and therefore it is unknown if they are "safe and effective"? Does the public know that they are replacing animals as test subjects and that the vaccine manufacturers are using THEM to learn if their vaccines are "safe and effective"? Does the public know that if they have an adverse reaction causing death or disability that the health authorities will deem their death or injury to be a "coincidence" and they will not be financially compensated? Does the public know that their unwarranted faith in govt, politicians, and health officials is responsible for their misfortune? Does the public know that they are the authors of their fate?

Yes they do know but being aware is quite different. People know that 2+3=5 but being aware what counting means is quite difficult.

4 ^ | v • Reply • Share ›

**sabateur** → Judy T • 6 days ago

even if there is/was a virus.

1 ^ | v • Reply • Share ›

**Byron** → Judy T • 9 days ago

What is the no-morbidity rate for SARS-COV-2? Far lower than 99%. There are no FDA approved treatments or prophylaxis for COVID-19 better than mRNA vaccines. Human clinical trials were done concurrently with animal studies to show safety and efficacy.

1 ^ | v 26 • Reply • Share ›

**sfrobink** → Byron • 9 days ago

It doesn't matter if the FDA hasn't approved treatments that work, when they work. Vit C taken in high quantities stops flus and colds. Vit D blood levels at 50ng/ml and higher show protection from the virus, whereas 30ng/ml does not. This is based on medical research. A good multi vit/min is important. Mushrooms are anti-viral. So is echinacea, goldenseal, elderberry and many more. We know because all of this works. I've boosted my immune system naturally and I didn't even get my usual flus. I think I have MORE immunity than anyone who's done a vaccine because the vaccines are for a particular viral strain - what if the virus mutates? Which it is doing. Vs my broad immune protection from taking lots of Vit C, Vit D, turmeric and a mushroom product with 17 dried mushrooms in a capsule. Been out the entire time, have had 5 negative tests, and I have an immune-compromised health condition. So, it's the degree of protection and natural boosting gives more immune protection than these dangerous vaccines.

Ok Privacy policy

replace those dead cells!

5. And "No," commercial collagen cannot replace any Vitamin C created collagen!

Note: Why not, because collagen that goes into your stomach is broken down in digestion and needs Vitamin C to be formed into collagen again...

6. And so the most vital ingredient that your body must have to create collagen is Vitamin C.

7. And when you are sick your Immune System also must have high doses of Vitamin C for that Viral battle!

8. So the more Vitamin C that is used in those two vital areas of the viral

Kim Mitzen → Byron • 9 days ago

You do realize that the mRNA vaccines and the other Johnson & Johnson Covid vaccine are not FDA approved either? They were granted EUA (emergency use authorization), which is not the same thing as FDA approval. They are considered experimental as they are still in clinical trials.

25 ^ | v 1 • Reply • Share ›

Judy T → Byron • 9 days ago • edited

The FDA - the Food and DRUG Administration - is interested in and approves only DRUGS. Non-drugs are the enemies of pharma. The FDA - larded with pharma execs and scientists - vilifies non-drug therapies. The FDA should be abolished because govt should not be involved in overseeing the health of the people. It is shocking how involved govt is in seemingly every aspect of our lives. Removing govt from food and drug safety, and removing pharma from influencing and corrupting doctors, will be BIG step forward in returning responsibility to the people, where it rightfully belongs.

13 ^ | v • Reply • Share ›

Kim Mitzen → Byron • 9 days ago

Additionally, there are successful treatments being used such as Ivermectin, Dexamethasone and Budesonide. And preventatively, taking things like Vitamin C, Vitamin C and zinc can help your immune system. The FDA has failed the American people by allowing these harmful vaccines to kill and seriously injure thousands of people.

“Temporal association does not imply causation for deaths after vaccination.” Of course it does - not something that’s absolute but a proper cause for concern. Our governments have demonstrated “hit and run” unconcern. Vaccinologists and government officials love association when it suits them not when it doesn’t.

19 ^ | v 1 • Reply • Share ›

**sfrobink** → John Stone • 7 days ago

Exactly. They have promoted the counting of all deaths in the hospital and at the coroner's office as covid deaths, whether or not they were. Then when someone dies after receiving a covid vaccine, it's not counted. So it's whether it suits their narrative, which is to promote the pandemic and the vaccines.

Uncompleted trials. You are a human experimental subject if you took the shot. Rushing and recklessness are not safety and the shots are proving to be fatal to many, leaving others permanently injured. That's a bad trade-off, not a solution to C19.

**fitnavygirl** → Judy T • 5 days ago

I reposted the CDC's own information about 'actual' deaths from Covid being only 6% of what they had reported, and stated above the CDC's post, "There is no pandemic." Without any prior incident, nor form of recourse or explanation, Facebook banned me for a month and when I inquired (through their own means), they permanently deleted my 13-year old account with pic/videos, etc. that I'll never get back. Obviously these giant tech corporations are in on this 'pandemic' scam!!! Scary what is going on, globally by elite globalists that demand submission and depopulation.

^ | v • Reply • Share ›

**herbprof** → Judy T • 5 days ago • edited

Everyone of your sentences is a very nice bullet, Judy... And studies have shown that if you number each one, that most people will feel compelled to read everyone of them, nice huh?

Note: Does the public know that at most only 10% of the Adverse Reactions and Deaths are reported to VAERS; says the CDC and FDA? Why not, because the law regarding the reporting of Adverse Events is not enforced?

So doctors and their staff see the reporting of those events as voluntary and you know

They hear the words when you tell them, then they swot them away like you would swot away an annoying buzzing fly. I have experienced this over and over, I have given the facts to family and friends, they are uninterested. The short term spoon fed so called solution holds the most appeal it seems.

^ | v • Reply • Share ›

Rick → Judy T • 7 days ago

The public knows what their media sources tell them. There are few sources providing the truth.

Until it hits home to them by people they know, they will continue on the msm road until it's too late.

^ | v • Reply • Share ›

Ektor • 9 days ago

I take the CDC numbers and multiply times 10. I think that is closer to the truth. After reading a few articles on Dr. Doug Corrigan's site about the injections and the possible long term effects, I think the worse is yet to come later this year and into next year.

Pharma doesn't have any clue as to how their poisons are going to work in the long run. There is no data to support any long term efficacy or safety conclusions.. It makes me wonder why the big rush to get everybody injected? The fake pandemic is winding down just as SARS CoV-1 did in the early 2000's. The gene therapy solutions will likely do little to fend off any mutations of CoV-2.

I now firmly believe that pharma and the corrupt government wants as many people injected as possible ahead of the extremely negative events that will occur due to Antibody Dependent Enhancement (ADE), which has rendered previous attempts at creating a corona virus vaccine all failures due to the vaccine's alterations of the immune system where viruses attacked the immune system without much problem. This was in animal trials and the animals that did not get the vaccine fared much better than those who did when exposed to viruses. Since the human trials were so short and very shallow with so few final participants, the future is an extremely huge question mark. I will never trust pharma, the government, or the media as far as my safety and decision making is concerned.

Yes, as all puppet leaders are today. Remember that the current president has just continued the Operation Warp Speed program and policies of the last president. "New boss same as the old boss..."

3 ^ | v • Reply • Share ›

**Judy T** → Mary Nelson • 8 days ago

With all the confusion, conflicting theories, differing interpretations of the evidence, with all the doubt about the "safety and efficacy" of these experimental vaccines, with all the vaccine adverse effects that are being dismissed as normal, the politicians, almost none of whom have a medical background, who are misusing their positions of authority to order the populace to do their duty to their fellow man and get vaxxed, these busybody know-nothing politicians and health authorities should shut up.

What the public needs is information from both sides of the virus/vaccine issue so they can be 'informed consumers.' The public needs their questions answered. Florida governor Ron DeSantis is holding Round Table meetings for the public to attend. This is what all of our leaders should be doing on the state, city, town, and neighborhood level. Lack of information breeds fear. And fear breeds compliant obedience to govt edicts.

3 ^ | v • Reply • Share ›

**Viren** → Mary Nelson • 7 days ago

Before you call them ineffective you should know that a great deal of context is left out of all of these articles. Here is a better link that provides at least some of the context on the Michigan data.

<https://www.bridgemi.com/mi...>

The question the writer and your community should be asking is what is the comparison of those vaccinated vs. not vaccinated. Michigan has a population of about 10 million people and almost 2 million people have been fully vaccinated. People that have been vaccinated to this point are those most in the frontline and exposed to the virus and those with the highest rate of mortality if they were to become infected. There have been 16,239 deaths in Michigan from COVID-19 and 4,018 between Jan 1 and March 31. Comparing the 3 deaths in vaccinated group to the 4000 or so that have not been vaccinated and focusing on the 3 cases is misguided. If you read further despite another wave of infections in Michigan they have fewer people in the ICU and zero percent of those cases that are in hospitals now have been vaccinated. Ideally, to be the most honest with the data, you would look for a cohort of people with the same comorbidities (age in

play today and has been put on the covid list (not available due to covid-related illness, and not counted on the roster). Add this injury to the list because I'm certain it ain't there.

15 ^ | v • Reply • Share ›

Mac Duff • 8 days ago

I have a friend who became very sick off the vaccine. He told me it felt worse than having coronavirus. He did not report it. He just rested at home during his recovery. Think about all of the people who are getting sick and are bed-ridden but not reporting.

13 ^ | v • Reply • Share ›

Paul Barbara → Mac Duff • 7 days ago

If you survive the first two shots without major 'adverse effects' or death, you can then wait in dread of the next time you face the 'wild' 'virus' again, or something similar, to see whether your body responds with a cytokine storm. No wonder so many health care and military are refusing the snake oil.

5 ^ | v • Reply • Share ›

Annie • 9 days ago

I think as weeks and months go by we will see more serious problems with the vaccine (which is not a vaccine). My brother in law said a cousin died from the vaccine so I seriously doubt that people who are dying from the vaccine are getting reported accurately. I can't even comprehend doctors going along with this, but I guess we can look back and see how they pushed flu shots. Doctor's are just legalized drug pushers. When you go to the doctor it is rare they don't prescribe something. Let me tell you I was diagnosed with asthma. I have been on the medication for it for about 5 years. One day the insert fell out and I was alarmed by the side effects. I thought I needed it, there were many times I could not breathe. So I stopped taking it. You know what? I can breathe! I haven't had any episodes of gasping for air. Imagine that. I guess that stuff could have killed me if I stayed on it.

12 ^ | v • Reply • Share ›

henk korbee → Annie • 9 days ago

I just read that it will take 4 to 14 months before the side effects will become clear. But what is a side effect? Something that you doesn't want, but as procedure for testing medicinal stuff with the so called golden rule, in order to get as least as possible side effects, isn't followed it can be stated that the side effects are wanted. Hence, an act of criminality.

6 ^ | v • Reply • Share ›

IraMad → henk korbee • 8 days ago
