# Sen. Rand Paul: Mask mandates and lockdowns from petty tyrants? No, not again. Choose freedom

Resist. They can't arrest us all. They can't keep all your kids home from school

OPINION By **Sen. Rand Paul** | Fox News

## Rand Paul says he is against vaccine mandates because he believes in a free society

Kentucky Republican explains why he is pro-vaccine but does not support mandates on 'Fox News Primetime'

Resist.

They can't arrest us all. They can't keep all your kids home from school. They can't keep every government building closed – although I've got a long list of ones they should.

We don't have to accept the mandates, lockdowns, and harmful policies of the petty tyrants and feckless bureaucrats. We can simply say no, not again.

Speaker Nancy Pelosi – you will not arrest or stop me or anyone on my staff from doing our jobs. We have all either had COVID, had the vaccine, or been offered the vaccine. We will make our own health choices. We will not show you a passport, we will not wear a mask, we will not be

forced into random screening and testing so you can continue your drunk with power rein over the Capitol.

### **CHICAGO MAYOR LIGHTFOOT RECOMMENDING CORONAVIRUS MASKS FOR RESIDENTS OVER 2, REGARDLESS OF VACCINATIONS**

President Biden — we will not accept your agencies' mandates or your reported moves toward a lockdown. No one should follow the CDC's anti-science mask mandates. And if you want to shutdown federal agencies again — some of which aren't even back to work fully — I will stop every bill coming through the Senate with an amendment to cut their funding if they don't come to work.

No more.

Local bureaucrats and union bosses — we will not allow you to do more harm to our children again this year. Children are not at any more risk from COVID than they are for the seasonal flu. Every adult who works in schools has either had the vaccine or had their chance to. There is no reason for mask mandates, part time schools, or any lockdown measures.

### **BIDEN SAYS AMERICANS SHOULD EXPECT MORE COVID RESTRICTIONS**

Children are falling behind in school, and are being harmed physically and psychologically by the tactics you have used to keep them from the classroom last year. We won't allow it again.

## **RAND PAUL HITS NIH DIRECTOR FOR MASK-AT-HOME COMMENTS: HOW CAN PEOPLE WHO ARE SO SMART SAY SUCH STUPID THINGS?**

Do I sound fed up to you? That's because I am.

I'm not a career politician. I've practiced medicine for 33 years. I graduated from Duke Medical School, worked in emergency rooms, studied immunology and virology, and ultimately chose to become a surgeon.

**We are at a moment of truth and a crossroads. Will we allow these people to use fear and propaganda to do further harm to our society, economy, and children?**

I have been telling everyone for a year now that Dr. Anthony Fauci and other public health officials were NOT following science, and I've been proven right time and time again.

**[CLICK HERE TO GET THE OPINION NEWSLETTER](#)**

But I'm not the only one who is fed up. I can't go anywhere these days — from work, to events, to airports and Ubers, restaurants and stores, without people coming up to me thanking me for standing up for them.

For standing up for actual science. For standing up for freedom. For standing against mandates, lockdowns, and bureaucratic power grabs.

### **More from Opinion**

- **[Tucker Carlson: Science is a seeking of the truth, not a political directive](#)**

- **Sen. Mike Braun: Biden, Dems are building an inflation bomb. Republicans must not help them light the fuse**
- **Greg Gutfeld: Our challenge isn't simply COVID, but overcoming those who politicize it to divide US**

I think the tide has turned, and more and more people are willing to stand up. I see stories from across the country of parents standing up to teacher unions and school boards.

I see members of Congress refusing to comply with Petty Tyrant Pelosi.

[\*\*CLICK HERE TO GET THE FOX NEWS APP\*\*](#)

We are at a moment of truth and a crossroads. Will we allow these people to use fear and propaganda to do further harm to our society, economy, and children?

Or will we stand together and say, absolutely not. Not this time. I choose freedom.

[\*\*CLICK HERE TO READ MORE FROM SEN. RAND PAUL\*\*](#)

Republican Rand Paul represents Kentucky in the United States Senate. He is the author of "The Case Against Socialism" (Broadside Books, October 15, 2019).

What do you think?

Sort by Best ▾

JonathanLB · 4 August, 2021

Amen! He's my favorite politician especially now, because he can literally say he knows the science. I've read all of the science, most of what they're pushing is the literal opposite of what science and data says.

Replies to JonathanLB

"He knows the science??" Paul is a trained ophthalmologist. I would expect he knows virtually nothing about epidemiology, virology and bio-statistics. Similarly, I happen to be a well-regarded international trade lawyer with impeccable credentials- what I know about real estate transactions or family law could fit in a thimble. While Paul opposes laws and "mandates" that try to protect us from dangerous neighbors, I wonder how he would feel about allowing our neighbors to tackle us while we're out on our lawn and breaking our ribs?- do you think he'd like to give that kind of "freedom" to people who endanger us?

Replies to rabbit70

An argument from authority is not a valid argument. You don't have to be a virologist to understand how a virus works. You just have to be able to read and understand. I am not a lawyer but I can certainly read a law book and understand a law. So don't assume that a person's degree or title precludes them from understanding an issue.

FooBar9K · 5 August, 2021

Replies to JWright5989

Also, pointing out a fallacy in the challenge of Rand Paul's credibility, doesn't make Rand Paul credible.

Rand Paul's views are inconsistent with the majority of medical community that which he is no longer part.

Ophthalmologists, unlike optometrists, have an MD degree aside from the specialty area. He would have a good deal of knowledge about viruses and their effects. My respect for "epidemiologists" over the past year and a half has declined dramatically because they apparently cannot see the forest for the trees. And Fauci in particular is not just biased, but complicit in at least one way regarding this virus. I would trust you in real estate more than I would trust Fauci in this virus.

Reply 73 6

**rabbit70** · 5 August, 2021

Replying to NavVet696

Thanks, I'll be happy to represent you in your next home purchase. But having an M.D. degree does not a virologist make! (I'm quoting Shakespeare here.) In professional circles it would constitute malpractice to hire Rand Paul for anything involving virology, immunology, epidemiology, infectious disease or really anything involving Covid. You could just as well hire Ilhan Omar.

Reply 2 27

N **NavVet696** · 5 August, 2021

Replying to rabbit70

I could hire Ilhan Omar if I wanted to fund a terrorist. I think your Shakespeare is a bit rusty. And I trust Dr. Paul can read a medical journal article better than you or I and determine whether the results make sense. At least I trust him a thousand percent more than that lying Fauci.

The Scientific Method is a process where a SCIENTIST collects and interprets data to reach a conclusion. That data and conclusion is then shared with other SCIENTISTS who then agree or disagree. They might even collect more data as needed. That is called PEER REVIEW. Prohibiting questions is NOT science, it is politics. Most high school students know this, they do not need to be a specialist to know this fact. Only a fool would follow the medical advice of somebody who does not even know the difference between a male and female.

**Deeyablo** · 5 August, 2021  
 Reply  59  5  
 Replying to dwightmann408

Okay. And Rand Paul is making decisions contrary to study data, directly counter to good science. So, by your metric, we should discount Rand's opinion. Thank you for providing that stellar clarification.

Reply   16

**D defensor\_ueritatis** · 5 August, 2021

He purposefully mis defines "gain of function" so he can shift blame for the virus. He spreads lies and dis-information on masks, distancing and vaccines. CAn go on but you should get the point.

Reply   9

**D dconnor5357** · 5 August, 2021  
 Replying to rabbit70

Being a little dramatic with the dangerous neighbor stuff eh bucko? This is a virus with an extremely high survivability rate, questionable at best numbers. What of those who have already had it or those who may never get it? As with any virus these factors exist. You can't assume your dangerous neighbors aren't one of these. Not to mention those that have health conditions that warrant not getting a vaccine. We can't pretend to know their situations. I don't question the science just the validity. What I never question is the Freedom of choice, including yours. I would never call you dangerous because you made your choices and you may think they're the right ones but someone else might not think so. Imagine the roles reversed. Stop with the self righteousness. The flip flopping is dizzying from those in authority.

Reply  47  7

D **defensor\_ueritatis** · 5 August, 2021

Replying to dconnor5357

Actually, other than the chance of dying unnecessarily, the real risk is in permanent lung, heart, Kidney or neurological damage and significantly increased risk of heart attack or stroke. These may be as high as 30% of those that were infected, and it does not matter if you were symptomatic or not. That does not count the long haulers either.

Your freedom of choice ends when you put other lives at risk.

Reply 10 71

J **JWright5989** · 5 August, 2021

Replying to defensor\_ueritatis

If someone does not want to be vaccinated, then they assume their own risk. My freedom of choice to take the vaccine is my own decision and risk. They are putting themselves at risk and it is their life at risk. I am not going to sacrifice because they don't want to be vaccinated. So my freedom of choice does not end when they have put their own lives at risk.

Reply 16 2

1 reply

x **xyzxyzzy** · 5 August, 2021

Replying to defensor\_ueritatis

It seems to me any lives being put at risk at this point are from people who have exercised their power of choice and not gotten vaccinated. That's on them not society.

Reply 8 2

D **defensor\_ueritatis** · 6 August, 2021

Replying to xyzxyzzy

Except they put others at risk, and they have no right to do so. In addition, every new infection gives chance to a new mutation that is far worse and not covered by the vaccines, putting everyone in the world at risk.

Reply 1 2

**HairyLegs/CornPop2020** · 5 August, 2021

Replying to defensor\_ueritatis

People are contracting the virus that have been jabbed just like the nonjabbed. So who is putting who in danger?

Reply 18 1

D **defensor\_ueritatis** · 5 August, 2021

Replying to HairyLegs/CornPop2020

99.9% of those getting infected did not get vaccinated. And, yes, those that were responsible and got a jab to protect themselves and others

are still at risk due to those who refuse to do the right thing. That is exactly the point.

Reply  4  32

x **xyzxyzzy** · 5 August, 2021 

Replying to defensor\_ueritatis

Wait, you are saying 99.9% of those getting infected did not have the vaccine AND even if you did get the vaccine you are still at risk. I'm not sure thats a good endorsement for the vaccine. The percentage of people who were vaccinated that have had break though is 0.004%. I think the risk is pretty low. Anyone who wants the vaccine can have one. If they choose not to, its on them. I've had mine, I don't want to wear a mask because of their choices and I am not all that worried given the stats about them infecting me. This is politicized hysteria.

Reply  11  1

D **defensor\_ueritatis** · 2 days ago 

Replying to xyzxyzzy

0.0004% is a made up number. The current data suggests just under 1% and so those not vaccinated and or wearing masks put peoples lives at risk. This also does not count children who are not vaccinated like children or people with certain conditions. As evidence compiles we see that kids with asymptomatic or mild symptoms may also have long term health issues and or permanent damage.

Your liberties are not more important than others right to life.

Until the shot is fully approved nobody is required to get one.

If the shot is safe, the FDA needs to guarantee that all who are adversely affected will be compensated.

Reply 279 28

κ **kjhazlett** · 4 August, 2021

Replying to Apoxyomenos

The FDA can't 'guarantee anything'. That wasn't how or why it was created. It was to oversee and regulate food and drugs. Prior to its creation there was no consumer protection of either food or drugs. Manufacturers and producers simply created whatever they wanted to try and profit from.

Reply 57 10

I do believe I remember Obama saying something similar? If it was not him, then it was the Democrats and probably Pelosi. I do specifically remember them saying something to that effect, no I cannot remember to what situation it applied. And I certainly agree with Rand Paul. I am wearing my mask by choice when shopping but that's it. It's amazing my little church of about 30 to 35 people has not seen a single case of coronavirus without wearing masks, social distancing and we sing and shout and praise God. Perhaps that's one of the benefits of God inhabiting the praises of his people.

Isn't it interesting that all the states that had the lockdown saw most cases of coronavirus by confining people into close quarters where there were groups of people getting together at one another's houses, the virus spread.

This is nothing more than the beginning of 2020 which is the modern version of George Orwell's 1984. We should all be very concerned people. The Mark of the beast

is coming. Without it we will not be able to sell, buy, trade, travel, and so forth. The hand writing is on the wall and no I'm not some fanatic here. *(Edited)*

Reply  212  29

**PleaseDogood** · 4 August, 2021 

Replying to ImpeachTraitorBiden

Lockdowns don't work. Ask any doctor, if we truly isolate from each other for two weeks, we'd be free of the cold, flu, and other viruses. But the problem is, lockdowns don't work because too many people depend on interaction with others to live, and can't isolate even if everyone tried.

The right approach to pandemics is to inform the public, and let business owners decide what safety protocols they'll (and customers and employees) use at their property and let the market figure it out. The government can of course, set their own safety protocols for government employees and those meeting them. Look at it now: government employees and contractors are pushing back against these mandates, so why should we follow them?

**rbimd** · 4 August, 2021

So many people are under the illusion that masks protect the wearer from infection. This is because our leaders and scientists have so poorly explained it. Masks stop the wearer from spreading respiratory droplets containing "germs" (viruses, bacteria) to surfaces where others can touch and spread them to their faces (esp. mouth, eyes). Masks do not "filter" out viruses from the air and protect the wearer (unless you wear a full-face CM-6M). HANDWASHING is more important than masks in stopping the acquisition of COVID infection so why is it NEVER mentioned...**See more**

Reply 155 21

**M marlinguidegun** · 4 August, 2021

Replying to rbimd

That was the belief early on, but this is an airborne virus, surfaces are much less important vectors. Or so they say. I'm not prepared to say that you are wrong because we continue to learn.

Reply 20 1

1 reply

**K kjhazlett** · 4 August, 2021

Replying to rbimd

Aren't the 'germs' 1 micron while the masks are designed to stop 3 microns? These masks aren't stopping anything. In fact, I heard an explanation by a 45 yr FBI mechanical engineer who likened this 'mask' fixation to 'shooting marbles' through a chain link fence. The fence doesn't stop the marbles and the mask doesn't stop germs. Also, unlike the one way air flow of HVAC filters, a mask deals with 2 way airflow-inhale/exhale-allowing germs to build up on the actual mask and then are transferred to the wearer and anyone in close proximity to the wearer.

Here's my biggest problem with so-called vaccine passports. The problem is that the authoritarians - even if they get their way and impose these passports nationwide - will still likely require masks and other restrictions - because (you guessed it!) even the fully vaccinated are dangerous. NOTHING WILL EVER BE ENOUGH.

**G gopforequality** · 5 August, 2021

The lockdowns last year are expected to kill about 900,000 people when all is said and done. Masks are only about 1-3% effective at stopping transmission. Republicans clearly handled the overall pandemic better than democrats last year. While covid numbers were about the same, the GOP run states had a much better quality of life, education, emotional and physical health, and economic health. Democrats need to let their insanity and fear mongering go and stop trying to prolong the pandemic for political reasons.

Reply 25 4

**thatChief** · 5 August, 2021

Replying to gopforequality

You make a LOT of claims regarding metrics that are difficult to track chief.

Would you care to share with the group where you got the data supporting the notion that "the GOP run states had a much better quality of life, education, emotional and physical health, and economic health"?

We will accept your silence as implicit confirmation that you have no such data to back up these claims.
