Dr. Charles Hoffe: MRNA Vaccines 'Will Kill Most People' Through Heart

5.8k
shares

Failure & 62% Already Have Microscopic Blood Clots

HUMANS
FREEHAF (<https://Humansarefree.Com/Author/Ascanu>) July 14, 2021

The vast majority of people who are getting injected for the Wuhan coronavirus (Covid-19

(<https://humansarefree.com/category/coronavirus>))

will die within a few short years from heart failure, warns Dr. Charles Hoffe, M.D.

(<https://principia-scientific.com/doctor-heart-failure-from-mrna-jabs-will-kill-most-people/>), a medical practitioner in British Columbia, Canada.

In one of his latest updates, **Dr. Hoffe** explains that he is observing in his patients **5.8k who took an mRNA (messenger RNA)**

“vaccine” from either Pfizer-BioNTech or Moderna that their capillaries are now plugging up, which he says will eventually lead to a serious cardiovascular event.

Wuhan Virus mRNA shots are programmed to turn a person's body into a spike protein “factory

(<https://www.naturalnews.com/2021-05-21-christiane-northrup-explains-risks-covid-vaccine-shedding.html>),” and Dr. Hoffe says that over time these mass-produced spike proteins cause progressive blood clotting.

No fewer than **60 percent** of people who take an mRNA injection will suffer from these blood clots – and in the end, an overwhelming majority will end up six feet under due to the damage caused.

“We now know that only 25 percent of the ‘vaccine’ injected into a person's arm actually stays in your arm,” Dr. Hoffe explains on his blog. “The other 75 percent is collected by your lymphatic system and literally fed into your circulation so these

little packages of messenger RNA, and by the way in a single dose of Moderna 'vaccine' there are literally 40 trillion mRNA molecules."

Dr. Hoffe says that while these packages were designed by Big Pharma (<https://humansarefree.com/category/big-pharma>) to be absorbed directly into people's cells, the only place they can actually be absorbed is around the blood vessels and into capillary networks, which are the tiniest blood vessels where blood flow is slow and where genes are released.

"Your body then gets to work reading and then manufacturing trillions and trillions of these spike proteins," he says "Each gene can produce many, many spike proteins. The body then recognizes these are foreign bodies so it makes antibodies against it so you are then protected against COVID. That's the idea."

MRNA Injections Insert "Spiky Bits" Into Blood Vessels, Eventually Causing Heart Failure

Though the claim has long been that these spike proteins act as a deterrent to viral infection after being injected into a person's body, the reality is that they actually become part of the cell wall of a person's vascular endothelium.

"This means that these cells which line your blood vessels, which are supposed to be smooth so that your blood flows smoothly now have these little spikey bits sticking out," explains Principia Scientific.

Dr. Hoffe says it is an inevitability that the injected will develop blood clots because as the vaccine-inserted spike proteins embed themselves within blood vessels and capillaries, blood platelets circulate around trying to fix the problem by creating

increasingly more clots

INCREASINGLY MORE CLOTS.

"So, when the platelet comes through the capillary it suddenly hits all these COVID spikes and it becomes absolutely inevitable that blood clots will form to block that vessel," he writes. "Therefore, these spike proteins can predictably cause blood clots. They are in your blood vessels (if mRNA 'vaccinated') so it is guaranteed."

It turns out that these blood clots are different than the "rare" ones spoken about on the media that show up on CT scans and MRIs. These are microscopic and do not show up on tests, as they can only be detected using a blood test known as D-dimer.

Dr. Hoffe has been performing D-dimer tests on his mRNA "vaccinated" patients, which led him to discover that **at least 62 percent of them have these microscopic blood clots.**

"The most alarming part of this is that there are some parts of the body like the brain, spinal cord, heart and lungs which cannot

iregenerate,” he says. “When those tissues are damaged by blood clots, they are permanently damaged.”
