BREAKING NEWS

A comparison of official Government reports suggest the Fully Vaccinated are developing Acquired Immunodeficiency Syndrome

BY THE EXPOSÉ ON OCTOBER 10, 2021 • (335 COMMENTS)

Listen Now

Latest UK PHE Vaccine Surveillance Report figures on Covid cases show that doubly vaccinated 40-70 year olds have lost 40% of their immune system capability compared to unvaccinated people. Their immune systems are deteriorating at around 5% per week (between 2.7% and 8.7%). If this continues then 30-50 year olds will have 100% immune system degradation, zero viral defence by Christmas and all doubly vaccinated people over 30 will have lost their immune systems by March next year.

By a concerned reader

(Read the latest update of this article here – ‘It’s worse than we thought – A comparison of official Government reports suggest the Fully Vaccinated are developing Acquired Immunodeficiency Syndrome much faster than anticipated’) (<https://theexpose.uk/2021/10/15/its-worse-than-we-thought-fully-covid-vaccinated-ade/>)

Weekly Decline in doubly vaccinated immune system performance compared to unvaccinated people...

Age group	Week36 Decline	Week37 Decline	Week38 Decline	Week39 Decline	Week40 Position	Average Weekly Decline	Weeks before total immune system failure (100% degradation)
18-29	-2.5%	-1.9%	-4.0%	-4.3%	+40.5%	-3.2%	44 weeks (140.5/3.2)
30-39	-6.0%	-7.0%	-10.5%	-11.4%	-3.3%	-8.7%	12 weeks (96.7/8.7)
40-49	-5.2%	-5.3%	-8.1%	-6.9%	-46.6%	-6.4%	9 weeks (53.4/6.4)
50-59	-4.0%	-2.4%	-3.9%	-5.7%	-40.1%	-4.0%	15 weeks (59.9/4)
60-69	-4.2%	-2.9%	-4.2%	-2.1%	-40.9%	-3.35%	18 weeks (59.1/3.35)
70-79	-4.1%	+0.7%	-3.9%	-3.6%	-34.4%	-2.7%	25 weeks (65.6/2.7)
80+	-5.6%	-7.1%	-3.1%	-2.5%	-9.8%	-4.6%	20 weeks (90.2/4.6)

Everybody over 30 will have lost 100% of their entire immune capability (for viruses and certain cancers) within 6 months. 30-50 year olds will have lost it by Christmas. These people will then effectively have full blown acquired immunodeficiency syndrome and destroy the NHS.

The vaccine booster shots have to be the same as the vaccines themselves, because it takes forever to do clinical trials and get approval for something different. So if you take a booster shot, these figures show that you are giving yourself an even faster progressive form of acquired immunodeficiency syndrome (after a couple of months of effectiveness).

Table 2. COVID-19 cases by vaccination status...

Pfizer originally claimed a 95% efficiency for their vaccine (calculated as in the last column above). The figures above indicate that their figures may well have been correct immediately after vaccination (the younger age groups have had the vaccine for the shortest time).

But the figures above also show that the vaccines do NOT merely lose efficiency over time down to zero efficiency, they progressively damage the immune system until a negative efficiency is realised. They presently leave anybody over 30 in a worse position than they were before vaccination. For more see [here](https://theexpose.uk/2021/10/01/uk-health-security-agency-report-proves-covid-vaccines-dont-work/). As some commentators have pointed out, the conclusion of this article is very weakly (if at all) supported by the raw data. For one thing, the authors are working solely off infection rates, comparing between vaxed and unvaxed, and infection (based, presumably on a positive covid test) does not demonstrate a failing immune system. For

credibility.

Perhaps, in the future, we will know of the immune depleting effects of the vax. But this article does not support that conclusion at all (and the more it is cited, i fear, the more vax-cautious folks will be regarded as kooks-with good reason.)

“the other metrics of emergency care admittance and death numbers clearly show that the vaxed are protected (very significantly) against serious adverse outcomes”

If that is correct, why is all cause mortality at least as high in the vaxxed as in the unvaxxed?

<https://probabilityandlaw.blogspot.com/2021/09/all-cause-mortality-rates-in-england.html>

You have nailed it Gary. Thank you so much. The ONS all cause mortality rates are the same for vaccinated as unvaccinated. So It is the mortality rates from PHE (which are 3x to 6x larger for the unvaxxed) which are incorrect not the case rates which are much more difficult to rig being way larger and being from genetic sequencing labs..

The PHE figures are for genetical sequenced Delta. They are not from PCR tests. That is why they are so consistent and so accurate. Had they been PCR results they would have been all over the place. You argue that one set of PHE figures (death and admissions) clearly show protection and the other set (genetically sequenced delta cases) do not support the conclusion of less immune system protection. Then you add a last line of slander which invalidates your objectivity entirely.

Fauci confirmed 2 months ago that viral loads were the same in the vaxxed as they were in the unvaxxed – from the Barnstable study in Mass. That means deaths should be the same. In fact deaths were the same in the PHE figures in late June just before Fauci made his statement. Then as the vaccines became less effective week on week thereafter, their death rates improved?!?! Go Figure.

is much higher and growing (see Israel f.e.) and that proves UnVaxxed can fight of Covid, as their immunesystems work better. Sweden (Scandinavia opened up completely) states Covid is comparable with heavy Flu strain in deathrates! But now we know Covid vaccines do not work...still vaxxed are treated first class and still spread Covid, even more! Covid Passports are only there for QR codes to serve Totalitarian Control and divide the people!

OMG. And, still people won't stand against this genocide. They will stand by and allow their children to be dragged into this yet. What does it take to wake people up?

At the moment keep reading ... no long term 5+ year data to see the final outcome and no immediate benefit as the vaxx does not prevent infection and transmission to warrant taking it. I have had the T-cell test to determine I have had the virus and that was positive so being recovered now best to wait. Probably take the test again in 1 year too see.
