THE EXPOSÉ

BREAKING NEWS

Just 1 in every 1.7 million children have died with Covid-19 in 18 months, whilst 1 in 9 children suffered a serious adverse reaction to the Covid-19 vaccine in the Clinical Trial

BY THE EXPOSÉ ON AUGUST 19, 2021 • (24 COMMENTS)

24

The Pfizer Covid-19 injection has been given emergency use authorisation to be used in children over the age of 12 in the UK by the MHRA, whilst the Joint Committee on Vaccination and Immunisation (JCVI) have decided that vulnerable children over the age of 12 and all 16 and 17 year olds should be offered the Pfizer jab. Both authorities claim that their decision is based on the benefits outweighing any potential risks.

According to [official NHS data](https://www.england.nhs.uk/statistics/statistical-work-areas/covid-19-daily-deaths/weekly-total-archive/) published weekly, between March 2020 and the 11th August 2021 a total of 3,743 people have died with Covid-19 in UK hospitals who had no underlying conditions, whilst 85,410 have allegedly died with Covid-19 who had other serious underlying conditions.

These conditions include ailments such as chronic kidney disease, chronic neurological disease, chronic pulmonary disease, heart disease, and dementia.

Title: COVID-19 deaths by type of pre existing condition
Summary: This file contains information on the deaths of patients who have died in hospitals in England and have tested positive for Covid-19, split by type of pre-existing condition. period specified below.
Period: All data up to 4pm 11 August 2021
Source: COVID-19 Patient Notification System
Basis: Provider
Published: 12 August 2021
Revised: -
Status: Published
Contact: enland.covid19dailydeaths@nhs.net

Breakdown of deaths by pre existing conditions:

Date introduced	Condition	Count of condition	Count of unknown or not reported for condition	Count of all deaths since condition introduced	% of deaths since introduced with condition	% of deaths (excluding unknown or not reported) with condition
24-Mar	Received treatment for a Mental Health condition	2,272	20,158	89,153	3%	3%
24-Mar	Learning Disability and or Autism	1,185	15,704	89,153	1%	2%
31-Mar	Asthma	6,765	-	87,557	8%	8%
31-Mar	Chronic Kidney Disease	14,559	-	87,557	17%	17%
31-Mar	Chronic Neurological Disorder	2,313	-	87,557	3%	3%
31-Mar	Chronic Pulmonary Disease	13,879	-	87,557	16%	16%
31-Mar	Dementia	13,770	-	87,557	16%	16%
31-Mar	Diabetes	23,044	-	87,557	26%	26%
31-Mar	Rheumatological Disorder	2,714	-	87,557	3%	3%
01-May	Ischaemic Heart Disease	8,876	-	68,738	13%	13%
31-Mar	Other	64,038	-	87,557	73%	73%

However, the vast majority of these deaths have occurred in people over the age of 80, and people between the age of 60 and 79; the vast majority of which are closer to the age of 79. The number given by the NHS of people who have died with Covid-19 since March 2020, between the ages of 0 and 19, who had underlying conditions is just 38. Whilst the people who have died with Covid-19 since March 2020, between the ages of 20 and 19, who had no other known underlying conditions stands at just 9.

Breakdown by pre existing condition

Age group	Pre existing condition			Total
	Yes	No	Unknown presence of pre-existing condition	
Total	85,410	3,743	0	89,153
0 - 19 yrs	38	9	0	47
20 - 39	575	98	0	673
40 - 59	5,887	665	0	6,552
60 - 79	32,615	1,565	0	34,180
80+	46,295	1,405	0	47,700
Unknown age	0	1	0	1

There are approximately 15.6 million people aged 19 and under (<https://www.statista.com/statistics/281174/uk-population-by-age/>) in the United Kingdom which means just 1 in every 410,526 children and teenagers have allegedly died with Covid-19 in 18 months, who had other serious pre-existing conditions. Whilst just 1 in every 1.7 million children have allegedly with Covid-19 in 18 months, who had no know pre-existing conditions.

Every death is of course a tragedy, especially when it is somebody so young, but we need to put these numbers into context now that an experimental injection is going to be given to children in the United Kingdom in the name of protecting them from Covid-19.

During the clinical trial to test the efficacy and safety of the Pfizer Covid-19 vaccine in children aged 12 and over, 1,127 children were given one dose of the mRNA jab, but only 1,097 children received the second dose. This fact in itself raises questions as to why 30 children did not receive a second dose of the Pfizer jab.

Of the 1,127 children who received a first dose of the jab a shocking 86% experienced an adverse reaction. Of the 1,097 children who received a second dose of the jab a shocking 78.9% experienced an adverse reaction.

Of course these adverse reactions include things such as a sore arm, so therefore it is vital to know the rate of serious adverse reactions that occurred during the limited clinical trial.

For children 12 to 15 years of age, the Pfizer COVID-19 vaccine clinical trial found the overall incidence of severe adverse events which left them unable to perform daily activities, during the two-month observation period to be 10.7%, or 1 in 9, in the vaccinated group and 1.9% in the

(<https://theexpose.uk/2021/10/01/october-fundraising-campaign/>)

Donate

1.6%, therefore, there were almost seven times more severe adverse events observed in the vaccinated group than there were Covid-19 cases in the unvaccinated group.

This information is all freely available to see in official Food and Drug Administration (FDA) documents (<https://www.fda.gov/media/144413/download>) and official Centre for Disease Control (CDC) document (<https://www.fda.gov/media/144413/download>)s.

Outcome 7: Reactogenicity^a, Severe (Grade ≥3) Studies with Unvaccinated Comparator (n=1)

Study/population	Events/Vaccine (n/N)	% Vaccine	Events/Placebo (n/N)	% Placebo
Pfizer/BioNTech, unpublished	121/1131	10.7	22/1129	1.9

a. Reactogenicity outcome includes local and systemic events, grade ≥3. Grade 3: prevents daily routine activity. Grade 4: requires emergency room visit or hospitalization. One participant in the vaccine group reported grade 4 pyrexia (40.4 °C).

As you can clearly see based on the number of children to have allegedly died with Covid-19 in 18 months, and the number of children to have suffered a serious adverse reaction in the clinical trial, the benefits of giving children the Covid-19 injection do not outweigh the risks.

But there may be some who naively believe children should be given the injection because it will help to prevent transmission of the Covid-19 virus, but that is not what these experimental injections do.

The Pfizer clinical trial was not designed to observe asymptomatic infection with SARS-CoV-2 or the effect of the vaccine on the spread (transmission) of COVID-19. Consequently, the FDA states (<https://www.fda.gov/media/144245/download>) that “it is possible that asymptomatic infections may not be prevented as effectively as symptomatic infections” and “data are limited to assess the effect of the vaccine against transmission of SARS-CoV-2 from individuals who are infected despite vaccination.”

Less than 0.1% of readers will support us even though we rely solely on your support. But if you and every other reader supported us today we could remove this annoying banner as The Exposé would have the funds to keep running for another year...

Table 5. Attendance to emergency care and deaths of confirmed and provisional Delta cases in England by vaccination status (1 February 2021 to 2 August 2021)

Variant	Age group (years)**	Total	Cases with specimen date in past 28 days	Unlinked	<21 days post dose 1	≥21 days post dose 1	Received 2 doses	Unvaccinated
Deaths within 28 days of positive specimen date	<50	71	N/A	2	4	4	13	48
	≥50	670	N/A	5	6	65	389	205
	All cases	742	N/A	8	10	69	402	253

Therefore due to the fact the Covid-19 vaccines do not prevent infection or transmission, 1 in every 9 children suffered a serious adverse reaction leaving them unable to perform daily activities during the clinical trial, and just 1 in every 1.7 million children having allegedly died with Covid-19 in 18 months, how on earth can the MHRA and JCVI justify giving the Covid-19 vaccine to children and claim that their decision is based on the potential benefits outweighing any risks?

Taking into consideration that the Pfizer and Moderna vaccines introduce Covid spike proteins into ones system, which are able to be shed, and infect the unva(ccc)inated, the mad scientists and government officials WHO have allowed this, and are continuing to allow this, have literally sewn division into our personhood and society. Proximity matters, and you can't circumscribe and keep within due bounds of all mankind, something which you cannot control. This violates the first principle Right To Be Free from harm, in person, place, and effects.

–Matthew Phillips ([https://www.facebook.com/matthew.phillips.9461?_cft__\[0\]=AZUtVvolCg89EBs3MSZXAzDR-HH_QEx_mvUaVIjFPvFExscG5XctPwJ5F-K_slBCQviSWO6nKM-H18qS2zzN4nVbCDSSM49nFliu-ieQB34z14aXTQ61UxmzSVdd2dHUsak&__tn__=-\]K-R](https://www.facebook.com/matthew.phillips.9461?_cft__[0]=AZUtVvolCg89EBs3MSZXAzDR-HH_QEx_mvUaVIjFPvFExscG5XctPwJ5F-K_slBCQviSWO6nKM-H18qS2zzN4nVbCDSSM49nFliu-ieQB34z14aXTQ61UxmzSVdd2dHUsak&__tn__=-]K-R))
