Randy Hillier, MPP
Lanark-Frontenac-Kingston

Statement from MPP Randy Hillier

The obligation and responsibility of every elected member is not simply to accept or promote public policy, but rather to examine and question public policy and provide supportive or critical commentary based upon observation and evidence.

This responsibility becomes a heightened priority when there is evidence or suspicion that great harm or fatalities may be a consequence of the public policy.

I call on Commissioner Thomas Carrique and the Ontario Provincial Police, as well as local law enforcement agencies to begin immediate criminal investigations to determine the facts of these and other tragic deaths, and determine if the administration of a pharmaceutical product was either a contributing factor or cause of death and injury.

It is my responsibility to bring to people's attention publicly available data that strongly suggests these pharmaceuticals are causing irreparable injury, and even death, in children and adults across Ontario.

Sincerely,
Randy Hillier

A handwritten signature in blue ink that reads "Randy Hillier".
