BREAKING NEWS

# Dr Mike Yeadon – “The findings that 100% of Covid-19 Vaccine Deaths have been caused by just 5% of the batches produced are unprecedented”

BY THE EXPOSÉ ON NOVEMBER 1, 2021 • ( 46 COMMENTS )

Listen Now

<sup>46</sup> On October 31st we revealed how an investigation of data found in the USA's Vaccine Adverse Event Reporting System (VAERS) has revealed that extremely high numbers of adverse reactions and deaths have been reported against specific lot numbers of the Covid-19 vaccines several times, meaning deadly batches of the experimental injections have now been identified.

The investigation uncovered several shocking findings, including that 100% of deaths reported to VAERS as adverse reactions to the Covid-19 injections were caused by just 5% of the batches produced.

Dr Mike Yeadon, former Vice-President of Pfizer, has detailed his thoughts on the conclusions of the investigation of VAERS data below.

Less than 0.1% of readers currently support us even though we rely solely on your support. But if you and every other reader supported us today we could remove this annoying banner as The Exposé would have the funds to keep running for another year...

[Read the full Investigation here](#)

*By Dr Mike Yeadon*

This information about different safety profiles of different “lots” (batches of finished product of covid19 vaccines) is completely without precedent.

I’m thinking about it and I don’t yet have clear in my mind what the envelope of plausible / possible explanations are.

But the bottom line is that the majority of lots were associated with good short term safety, few hospitalisations & deaths, which is true for both the Pfizer & Moderna injections.

Less than 0.1% of readers currently support us even though we rely solely on your support. But if you and every other reader supported us today we could remove this annoying banner as The Exposé would have the funds to keep running for another year...

## AE reports by lot number

46 But in both cases, a small number of vaccine lots are associated with incredibly high rates of adverse events including deaths.

How can this possibly happen? Drug manufacturing is performed to exacting standards of control. The 'active' agent is made in batches. It cannot be guessed how many doses each batch makes, because no one has ever made commercial scale mRNA products before.

But each batch of what's called "drug substance" is then used to formulate, fill, pack & label various lots of finished drug product.

Testing methods are developed for all of the manufacturing steps, together with standards for the results to be considered acceptable.

Less than 0.1% of readers currently support us even though we rely solely on your support. But if you and every other reader supported us today we could remove this annoying banner as The Exposé would have the funds to keep running for another year...

# FINDING 1: PFIZER – SOME LOTS ASSOCIATED WITH very high Deaths per lot

## Possible explanations (not exhaustive):

1. Errors made in the final steps of manufacturing which resulted in certain batches being reasonably benign & others extraordinarily deadly. I just cannot imagine the kind of mistakes which could produce such radically different clinical profiles. For example, poor handling during shipping & storage prior to

**Less than 0.1% of readers currently support us even though we rely solely on your support. But if you and every other reader supported us today we could remove this annoying banner as The Exposé would have the funds to keep running for another year...**  
(<https://theexpose.uk/2021/11/01/november-fundraising-campaign/>)

[Donate](#)

of clinical safety profile.

There has been so much truly awful behaviour of “elites” that I’m simply not willing (as I would have historically) to dismiss the possibility that this has been done on purpose.

What I do know, and this is a test of whether there’s the slightest sign of integrity from these companies as well as the regulatory agencies, is that all use of the affected produce must immediately cease, all batches of drug substance & lots of drug product should cease.

The materials should be recalled to a place of stable storage & an intense analytical investigation initiated.

Unless factors are found which adequately explain the huge differences in clinical adverse event profiles, administration to humans must not restart.

If the manufacturers do not exhibit sufficient control of drug product, the authorisation they hold from various regulatory authorities are utterly voided.

Just when you thought this debacle couldn’t possibly get any worse, it gets much worse.

Expect to hear more about this.

Meanwhile, who in their right mind would roll up their sleeve?

not sure

🕒 10 days ago

I don't know if lots would be distributed together to certain facilities or types of facilities... But we know its policy to NOT use VAERS in some places, a lot of places. Maybe thats what this data is showing. Either people used VAERS differently in different places or differently at different times. I suppose the very first batches would be going to old people that were going to die soon anyway?

I'm sure the manufacturing was sloppy, but so it is all down the line. None of these people are hired for their competence. Maybe some lots spoiled in a hot truck.

Pfizer have admitted to 12 different experimental formulations. One was blessed by the FDA as Cominirty. But Pfizer said they will not be making that – they are going to sell all the old stocks of previous experimental vaccines. The “emergency licence” went through Congress – it allows this. The 2019 Plandemic Conference had this as 1 of 9 recommendations. It also allows use without consent “if informed consent would not be in their interest”. So, the Australian troops can knock on doors and forcibly inject people – the Globalists now insist on duplicate legislation around the world.

↩ Reply

Point 1 is that some batches were highly poisonous.

Point 2 (not addressed by Dr Yeadon) is that those specific batches were then widely dispersed across many (12+) states, unlike any of the 'safe' batches. That is the smoking gun, indicating this was not a benign error.

We have to stop working from the assumption that the jabs were meant to be a good thing and start working from the assumption that the jabs were always part of a eugenics program. If we extrapolate from there, the only conclusion we're left with is that the reason for "lots" is so that the various recipes used in the various lots could be tracked and data from them could be calculated to determine which recipe caused what issues. It is, as Dr. Tom Cowan called it, beta testing. <https://rumble.com/vnd26k-red-pill-interview-dr.-tom-cowan.html> (<https://rumble.com/vnd26k-red-pill-interview-dr.-tom-cowan.html>)

Spot on. The Only reason not everyone dies soon after a 'life saving injection' is because the vast majority of them are placebos. Can you imagine the reaction of over 7 Billion people worldwide against a few thousand elites if millions injected everyday died?

This is exactly what is happening. Can everyone please join me in calling the cdc and all state health departments to simply INQUIRE about this finding? I was hung up on 4 times yesterday.

During the 80's there was a Tylenol poisoning scare that killed 7 people. It was a big deal. All product recalled. Investigated.

There is a dr sounding the alarm, and as far as I can tell, there is NO investigation being done. If we can't get anywhere with the health departments, we need to start calling and informing the schools and pediatrician offices and inquire with them. And have THEM contact the cdc as well. If no one can even confirm if it's being looked at, then all injections must stop. I feel if enough of us do this, it will cause enough LOCAL alarm. Forcing them to respond and investigate.

Please see testimony from John O'Looney who is the funeral director out of the UK. He has stated that the only way this works is if there are placebo batches as the death jab can't be in 100% of the shots or it would be too obvious. He estimates around 15% of the shots are death shots and the other 85% are placebo.

<https://odysee.com/@thecrowhouse:2/MUST-WATCH-Funeral-Directer-John-O'Looney-Blows-the-Whistle-on-Covid:9> (<https://odysee.com/@thecrowhouse:2/MUST-WATCH-Funeral-Directer-John-O'Looney-Blows-the-Whistle-on-Covid:9>)

<https://www.bitchute.com/video/xF8STMqVIQuP/> (<https://www.bitchute.com/video/xF8STMqVIQuP/>)

This also jives with the Pfizer scientist on hidden camera in the Veritas video who said he found some test subjects produced ZERO antibodies which should be impossible with this technology. His boss told him specifically NOT to investigate. He likely found a batch of the placebo.

Spot on. Also, John O'Looney thinks the boosters will be all real shots.

Also, remember that several scientists have said the vials vary. One Polish scientist claims he examined 5 Pfizer vials: 2 were placebos, and the rest had bizarre nano-tech.

i used to work at a care home in UK. ~2100 people died out of ~14000 injected. the funeral director is spot on with 15% ratio of short term deaths. however, there are many more people still hospitalised and developing severe complications so many will die in due course. basically, old people are dropping like flies after the injections.to compare: before the injections started, there were "covid outbreaks" in the care homes but barely anybody died (less than 1%). unfortunately, there was another issue: at the beginning of the lockdowns in 2020, employees and nurses were so scared of the "virus", that they would not show up to work. there was no one in the care homes to administer essential medicines or even food. doors were shut and no families allowed to visit or take care of their parents / grandparents. many oaps died of negligence and stress. that varied between homes. from my understanding and interviews: somewhere between 5% to 10% residents (~800 to ~1600) died this way. very sad. in TV, they said it was covid. it's a lie – cover up. now gvt is planning to inject these poor oaps with 3rd syringe. how many will survive? i guess not many. a number of care homes already shut down, sold, etc. please note that my internal data only accounts for one care homes company. i suspect that this is proportionate to entire population. 15% of all pensioners in the UK are probably killed by now. took gvt less than 1 year to achieve this result. imagine all the money saved on pension pay-outs!

Statistically speaking, the fact that the batches sent to 13+ states were 22 times more deadly does suggest that handling and transit, re transit is deadly. Or these batches were deliberately poisoned and the death toll spread around. Anyway, the total lack of batch control makes the USA a banana republic – or a Stalinist Gulag.

Within 8 days of their DPT vaccination, 11 infants died in Tennessee. Nine of the 11 had received DPT vaccine from Wyeth Laboratories lot 64201. Four of the 11 were dead in 24 hours.

All the deaths, which coroners classified as crib deaths (technically, sudden infant death syndrome), occurred between August 1978 and March 1979.

On April 26, 1979, the US surgeon general called for a meeting with officials from CDC, FDA, top DPT researchers and drug manufacturers.

CDC reported on a survey of states that had received 7,500 or more doses of lot 64201.

The survey yielded 14 more infant deaths — half within 24 hours of a DPT shot. All were classified as crib deaths. However, the children had received vaccine from other lots [in addition?].

Three years later, the first major article about the so-called Tennessee cluster appeared in the Journal of Pediatrics: “panel could not find a causal relationship between lot 64201 and crib death although it could not exclude one, either.”

In Fresno County, Coroner Dr. David Hadden researched records from an unusual cluster of crib deaths in 1981.

There is no statute of limitations on murder, yet current law places a ten-year statute of limitations on the crime of conspiracy to commit murder—luckily for Wyeth Pharmaceuticals, a criminal vaccine manufacturer.

I wonder if murder charges can still be brought against Wyeth if it can be proven that their DTP vaccine was responsible for a child’s death?

Wyeth is currently owned by Pfizer.

That's the size of the lots! Some lots are intended for private practices or small health centers, while others are intended for mass vaccination centers or hospitals! This is why the lots that have the most adverse reaction reports are distributed in more states: they are simply much larger and split up to be distributed throughout the territory! Redo the calculations taking into account the size of the lots, and you will see that I am right!

my hypothesis is that due to the CENSUS in all countries the establishment know full well who what and where people are that they want to get rid of – they have all the info from the census-its all worked out methodically in regions-Also agree that deaths will come in waves-those who have had the placebo's or should one say the least lethal poison will then get a stronger lethal poison the next jab[time] and so on so that people dont get too suspicious too soon of the adverse reactions and death – ive read that some people are allocated a lot number for their jab which has their name on it for example in different areas in the uk people are being physically telephoned and invited to come in for 'their jab' which the lot number is designated for.

There are no such things as terrorists. They're just people – almost always individuals – getting revenge for what you did to them. Labelling everyone you punched as a 'terrorist' when they quite rightly punch you back is what led to the entire world seeing 'planes' hitting tower blocks and 20 year wars. Stop playing their game and start punching them.

This is another superb report, for which many thanks again!

I feel it is marred by one small thing which will, unfortunately, lower the credibility of the entire report – even though it should not.

The admirable Mike Yeadon was not the vice-president of Pfizer, but only of its allergy and respiratory research division – at least according to Wikipedia:

"He previously served as the chief scientist and vice-president of the allergy and respiratory research division of the drug company Pfizer (<https://en.wikipedia.org/wiki/Pfizer>)"

If that's true it makes him more credible. All along I accepted his words with a pinch of salt as was unable to trust in anyone who worked on developing vaccines. I consider them to be poisons, all of them based on a decade research on them and they / him must knew that. However if his job was questioning safety, that's another story.

People are deluded about it, many years of brainwashing and lies on safety and efficiency, while in fact they eradicated nothing but caused countless autoimmune conditions. Vaccinations was a failure since the start but our tyrants saw the huge opportunity to lie about it. Pasteur killed more with his rabies shots than the actual illness which was and is an umbrella term for brain inflammation caused by several different things. (<https://docest.com/rabies-past-present-in-scientific-review-excerpt-from-poisoned-needle>) (<https://docest.com/rabies-past-present-in-scientific-review-excerpt-from-poisoned-needle>))

I can't trust anyone who worked on vaccines / to Big Pharma.

**We need to know the LOT SIZES. Without that we can't state anything significant.**

“an average lot size of 1000 vials (approx. 6000 doses).” That doesn't tell us anything, because one lot could be 60,000 doses for a large urban area and another for a small town of 500 doses.

Why don't you ask Pfizer for a list of the lot sizes to clarify the issue? It might be there's a rational explanation.

Call the cdc and ask if they even know about it. All I wanted to know when I called is if it was being investigated. I don't see how this is not a health emergency that they would want to know about. I got rerouted and hung up on 4 times. This assured me it hasn't been looked into. Please call them. Ask questions. Call the state health departments. I'm going to start calling schools soon. Then try to get the schools to start asking questions. People are just blindly following orders from above.

Having closely studied VAERS reports, I noted 131,000 approximately that were classified as serious connected to COVID vax. None of these people received placebos and I do not see the follow up one would expect. A good number are listed "foreign". I don't know what that means but the ones I saw contain no follow up as none was possible. I can imagine a large percentage of people who died were just cremated without an autopsy, especially if they had serious health issues or were older. low income people living alone would be much less likely to have their deaths questioned than those living with family or friends. It's possible no one would even know they had been inoculated. Especially they had no connection to a community, I.e. through employment. We are seeing doctors on television every day telling people to get vaxed and lying about the so called benefits and danger of Covid and variants. Doctors telling the truth are in real danger. The funeral director in the UK who came forward cannot be the only one aware of what is happening. Threats, bribes and blackmail can keep the truth from coming out, with the help of media censorship. I heard a doctor talking about the ability to target people by ethnicity, sexuality etc. This is the worst evil the world has ever seen. Sadly, I think we assume the worst. They have no moral boundaries so if they can they will.

my first thought was what % of each lot are AE or deaths (i.e. maybe those with more AEs are just larger lots)?

Secondly, if those lots with high AEs have to travel over long distances, this could theoretically cause the degradation of RNA (as mentioned in the article). Maybe it is not degrading completely and there are some erroneous protein(s) being produced in those lots?
