BREAKING NEWS

# FDA experts ask why Kids are “dropping like flies” right after getting the Covid-19 Vaccine as they meet to debate authorisation of the Pfizer jab for 5-11-year-olds

BY THE EXPOSÉ ON OCTOBER 26, 2021 • ( 22 COMMENTS )

Listen Now

On October 26th 2021, the Food and Drug Administration (FDA) held a meeting of the Vaccines and Related Biological Products Advisory Committee (VRBPAC) to review the safety and efficacy of the Pfizer mRNA Covid-19 injection and decide whether or not to extend the Emergency Use Authorisation of the Pfizer vaccines for children aged 5 to 11.

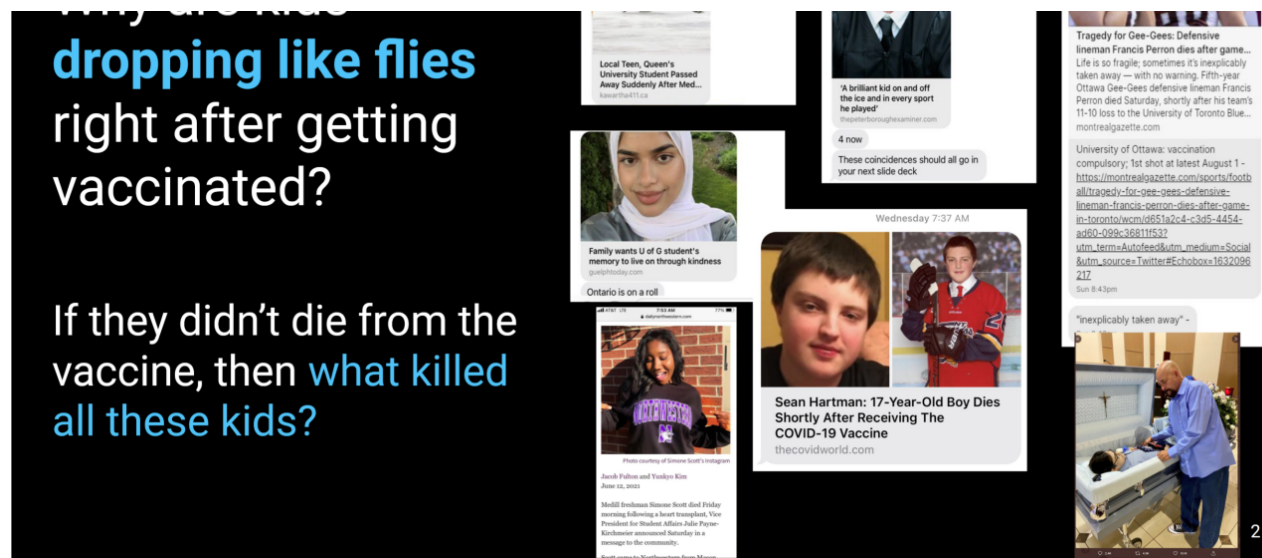

Steve Kirsch, Executive Director of the Covid-19 Early Treatment Fund was invited to speak at [the meeting](https://www.fda.gov/advisory-committees/advisory-committee-calendar/vaccines-and-related-biological-products-advisory-committee-october-26-2021-meeting-announcement) and due to the short time frame given to speak he felt it was best to prepare 30 slides which asked some extremely serious questions on the safety of giving an experimental injection to children.

Every question asked by the Executive Director of the Covid-19 Early Treatment Fund were questions that he feels need to be answered before any vote to authorise Covid-19 vaccination for 5 to 11-year-old children, and they were as follows...

The doctors found nothing.

What did the CDC find?

My son died, while taking his math class on Zoom. We are waiting for the autopsy because the doctors did not find anything. He was a healthy boy, he had a good academic index, he wanted to be a civil engineer. He was the best thing in my life.

CORPUS CASE #  
21-0000670

INCIDENT INFORMATION

LAW ENFORCEMENT AGENCY WITH JURISDICTION Santa Rosa Police Department	REPRESENTATIVE TITLE AND NAME Officer Jose Andrade #568	AGENCY CR # / ID NO 21-0006115
MODE OF DEATH Undetermined	DATE/TIME RECEIVED 06/07/2021 14:35	

DECEDENT INFORMATION

DECEDENT'S NAME (FIRST, MIDDLE, LAST) [REDACTED]	AGE 15 yrs	
-----------------------------------------------------	---------------	--

DEATH INFORMATION

PLACE OF DEATH (If not home or address location) [REDACTED]	DATE OF DEATH 06/07/2021 [Found]	TIME OF DEATH 14:04 [Found]
----------------------------------------------------------------	-------------------------------------	--------------------------------

SYNOPSIS

The decedent was found unresponsive in his bedroom after his mother was checking on his welfare long after he was supposed to wake in the morning. The decedent was pronounced dead at the scene due to obvious death. The decedent had been in good health with no medical history and had received his second Pfizer COVID-19 Vaccination approximately two days before his death.

The decedent's body was transported to the Sonoma County Morgue Facility, where he was registered for a postmortem examination by a forensic pathologist.

After extensive research, additional testing, and collaboration with numerous other entities, the cause of death was determined to be: "STRESS CARDIOMYOPATHY WITH PERIVASCULAR CORONARY ARTERY INFLAMMATION (hours to days), due to, UNKNOWN ETIOLOGY IN SETTING OF RECENT PFIZER-BIONTECH COVID-19 VACCINATION (days)." There were no other significant conditions contributing to the death listed.

Since the etiology of the stress cardiomyopathy with perivascular coronary artery inflammation was unknown but was in the setting of a recent Pfizer-Biontech Covid-19 vaccination, I mannered this death as "UNDETERMINED," which was consistent with the circumstances and cause.

are so safe,  
how come  
Taiwan officially  
admits that the  
vaccines kill  
more people  
than the virus?

Anabel V. @Anabel\_Villeroy · 49m  
More die after 📰 in Taiwan than from C19 itself.

Looks like Taiwan is recording vaccine deaths properly – unlike the US where you are not considered vaccinated until 14 days post-inoculation.

A convenient way for the CDC to hide vaccine-induced mortality data.

### Children are up to 16 times more likely to die with Covid-19 if they've had the Covid Vaccine according to latest UK Health Security Agency report

by Daily Exposé

The latest report from the UK Health Security Agency shows that the Chief Medical Officer (CMO) for England's decision to recommend all children over the age of 12 should be vaccinated against Covid-19 was a huge mistake because the data shows children are 16 times more likely to die with Covid-19 if they have been [...]

How are Germany and Norway both able to determine causality in sample sizes of 100 or less, but the CDC can't determine causality in over 16,000 deaths it has investigated?!?

The CDC has not reported a death rate for children who have received a COVID-19 vaccine as higher than the rate of death for children who are infected by the virus.

In fact, the agency also says there is no clear evidence that any of the three COVID-19 vaccines used in the United States have caused any deaths.

## Why are there no autopsies for deaths after vaccination?

Schirmacher, one of the world's top pathologists, found that at least 30% to 40% of the deaths that happened within 2 weeks after COVID vaccination were caused by the vaccine.

August 1, 2021, 9:53 a.m. Science - Heidelberg

**Why didn't the highly unusual causes of deaths in these kids raise any red flags in the CDC 12-17 safety study?**

They didn't even comment. Just “move on, nothing to see here.”

If just 10 of the 14 deaths were caused by the vaccine, then that's ~410 children killed so far which is nearly 10X more than we might save with these vaccines.

CDC reviewed 14 reports of death after vaccination. Among the decedents, four were aged 12–15 years and 10 were aged 16–17 years. All death reports were reviewed by CDC physicians; impressions regarding cause of death were pulmonary embolism (two), suicide (two), intracranial hemorrhage (two), heart failure (one), hemophagocytic lymphohistiocytosis and disseminated *Mycobacterium chelonae* infection (one), and unknown or pending further records (six).
