## Whistleblower: FDA and CDC Ignore Damning Report that over 90% of a Hospital's Admissions were Vaccinated for Covid-19 and No One Was Reporting This to VAERS

Physician Assistant, Deborah Conrad, bravely reports these harms and is barred from filing VAERS reports

A concerned Physician Assistant, Deborah Conrad, convinced her hospital to carefully track the Covid-19 vaccination status of every patient admitted to her hospital. The result is shocking.

As Ms. Conrad has detailed, her hospital serves a community in which less than 50% of the individuals were vaccinated for Covid-19 but yet, during the same time period, approximately 90% of the individuals admitted to her hospital were documented to have received this vaccine.

These patients were admitted for a variety of reasons, including but not limited to COVID-19 infections. Even more troubling is that there were many individuals who were young, many who presented with unusual or unexpected health events, and many who were admitted months after vaccination.

One would think that after an association was identified by a healthcare professional, our health authorities would at least review this finding, right? Sadly, when Ms. Conrad reached out to health authorities herself, she was ignored. My firm then sent a letter to the CDC and FDA on July 19, 2021 on Ms. Conrad's behalf (see letter below), yet neither agency has responded. Even worse, when doctors came to Ms. Conrad for assistance with filing VAERS report for their patients, the hospital prohibited her from filing these reports.

That the CDC and FDA failed to respond is arguably not surprising – they have been cheerleading this vaccine for months. Admitting almost any harm now would be akin to asking them to turn a gun on themselves.

**This again highlights the importance of never permitting government coercion and mandates when it comes to medical procedures.**
