5-Year-Old Died 4 Days After Pfizer Shot, CDC VAERS Data Show

VAERS data released today by the Centers for Disease Control and Prevention included a total of 927,740 reports of adverse events from all age groups following COVID vaccines, including 19,532 deaths and 146,720 serious injuries between Dec. 14, 2020, and Nov. 26, 2021.

Miss a day, miss a lot. [Subscribe to The Defender's Top News of the Day. It's free.](#)

The Centers for Disease Control and Prevention today released new data showing a total of [927,740 reports of adverse events](#) following COVID vaccines were submitted between Dec. 14, 2020, and Nov. 26, 2021, to the Vaccine Adverse Event Reporting System (VAERS). VAERS is the primary government-funded system for reporting adverse vaccine reactions in the U.S.

The data included a total of [19,532 reports of deaths](#) — an increase of 283 over the previous week — and [146,720 reports of serious injuries](#), including deaths, during the same time period — up 3,325 compared with the previous week.

Excluding “foreign reports” to VAERS, [672,373 adverse events](#), including [8,986 deaths](#) and [57,143 serious injuries](#), were reported in the U.S. between Dec. 14, 2020, and Nov. 26, 2021.

[Foreign reports](#) are reports received by U.S. manufacturers from their foreign subsidiaries. Under U.S. Food and Drug Administration (FDA) regulations, if a manufacturer is notified of a foreign case report that describes an event that is both serious and does not appear on the product’s labeling, the manufacturer is required to submit the report to VAERS.

Of the 8,986 U.S. [deaths reported](#) as of Nov. 26, 20% occurred within 24 hours of vaccination, 26% occurred within 48 hours of vaccination and 61% occurred in people who experienced an [onset of symptoms](#) within 48 hours of being vaccinated.

In the U.S., 454 million COVID vaccine doses had been administered as of Nov. 24. This [includes](#) 264 million doses of Pfizer, 173 million doses of Moderna and 16 million doses of Johnson & Johnson (J&J).

Search Results

From the 11/26/2021 release of VAERS data:

Found 927,740 cases where Vaccine is COVID19

[Government Disclaimer on use of this data](#)

Table

↓	↑ ↓	↓
Event Outcome	Count	Percent
Death	19,532	2.11%
Permanent Disability	31,652	3.41%
Office Visit	145,285	15.66%
Emergency Room	59	0.01%
Emergency Doctor/Room	102,544	11.05%
Hospitalized	99,671	10.74%
Hospitalized, Prolonged	272	0.03%
Recovered	277,660	29.93%
Birth Defect	691	0.07%
Life Threatening	21,931	2.36%
Not Serious	402,221	43.35%
TOTAL	† 1,101,518	† 118.73%

† Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 927740 (the number of cases found), and the Total Percentage is greater than 100.

Every Friday, [VAERS](#) publishes vaccine injury reports received as of a specified date. Reports submitted to VAERS require further investigation before a causal relationship can be confirmed. Historically, VAERS has been shown to report only [1% of actual vaccine adverse events](#).

U.S. VAERS data from Dec. 14, 2020, to Nov. 26, 2021 for 5- to 11-year-olds show:

- 2,586 [adverse events](#), including [34 rated as serious](#) and [2 reported deaths](#). One death occurred in an 11-year-old girl from Georgia vaccinated Sept. 14, prior to the authorization of Pfizer's COVID vaccine in the 5 to 11 age group.

The second death (VAERS I.D. [1890705](#)) occurred in a 5-year-old girl who died four days after receiving her first dose of Pfizer.

- 1,581 [adverse events](#) have been reported in the 5 to 11 age group since Nov. 1.

U.S. VAERS data from Dec. 14, 2020, to Nov. 26, 2021 for 12- to 17-year-olds show:

- 23,871 [adverse events](#), including [1,453 rated as serious](#) and [31 reported deaths](#).

The most recent death involves a 16-year-old girl from Georgia (VAERS I.D. [1865389](#)) who died reportedly from a heart condition and multi-organ failure two days after receiving Pfizer's COVID vaccine.

- [60 reports](#) of anaphylaxis among 12- to 17-year-olds where the reaction was life-threatening, required treatment or resulted in death — with 96% of cases attributed to [Pfizer's vaccine](#).
- [563 reports](#) of myocarditis and pericarditis (heart inflammation) with [553 cases](#) attributed to Pfizer's vaccine.
- [139 reports](#) of blood clotting disorders, with all cases attributed to Pfizer.

U.S. VAERS data from Dec. 14, 2020, to Nov. 26, 2021, for all age groups combined, show:

- 19% of deaths were related to cardiac disorders.
- 54% of those who died were male, 42% were female and the remaining death reports did not include gender of the deceased.
- The [average age](#) of death was 72.7.
- As of Nov. 26, [4,480 pregnant women](#) reported adverse events related to COVID vaccines, including 1,411 reports of [miscarriage or premature birth](#).
- Of the [3,219 cases of Bell's Palsy](#) reported, 51% were attributed to [Pfizer](#) vaccinations, 41% to [Moderna](#) and 8% to [J&J](#).
- 764 reports of [Guillain-Barré syndrome](#) (GBS), with 42% of cases [attributed to Pfizer](#), 29% to [Moderna](#) and 27% to [J&J](#).
- [2,163 reports](#) of anaphylaxis where the reaction was life-threatening, required treatment or resulted in death.
- [11,334 reports](#) of blood clotting disorders. Of those, [5,024 reports](#) were attributed to Pfizer, [4,037 reports](#) to Moderna and [2,222 reports](#) to J&J.

- [3,257 cases](#) of myocarditis and pericarditis with [2,025 cases](#) attributed to Pfizer, [1,085 cases](#) to Moderna and [137 cases](#) to J&J's COVID vaccine.

Athletes experience devastating injuries following COVID vaccines

As [The Defender reported](#) Dec. 2, several high-performing professional athletes are facing the end of their careers after COVID vaccines destroyed their health.

World record-holder in static breath-hold freediving, veteran triathlete, professional tennis player, professional mountain biker—all high-performing athletes until COVID vaccines ruined their health + their careers. [#TheDefender: https://t.co/zL66Edfiw5https://t.co/L76vBedOOW](#)

— Robert F. Kennedy Jr (@RobertKennedyJr) [December 2, 2021](#)

Florian Dagoury, a world record-holder in static breath-hold freediving, who once held his breath for a shocking 10 minutes and 30 seconds, was diagnosed with [myocarditis](#), pericarditis and trivial mitral regurgitation after receiving [Pfizer's COVID vaccine](#).

Dagoury said he now struggles to reach an 8-minute breath-hold, feels an urge to breathe doing 40-minute dives, can't keep his heart rate low and experienced a 30% decrease in his diving performance.

BUY TODAY: Robert F. Kennedy, Jr.'s New Book — 'The Real Anthony Fauci'

Veteran triathlete Antoine Méchin, 32, is also facing the potential end to his career after experiencing a pulmonary embolism after receiving [Moderna's COVID vaccine](#).

The symptoms, which included breathing problems and arm pain, started after the first dose, but doctors brushed off his shortness of breath as related to stress and fatigue.

[Jeremy Chardy](#), a 34-year old professional tennis player ranked 73rd in the world, suspended his season due to a severe adverse reaction to a COVID vaccine, which left him unable to engage in intense activity.

[Kyle Warner](#), a 29-year-old professional mountain bike racer, developed pericarditis, postural orthostatic tachycardia syndrome (POTS) and reactive arthritis following his second dose of Pfizer's COVID vaccine.

Warner's [reaction](#) was so severe that, as of October, he was still spending days in bed, overwhelmed by too much mental or physical exertion.

Two professional soccer players collapse during games

A professional soccer player collapsed suddenly on Nov. 25, during a Real Madrid's Champions League game with Sheriff Tiraspol, a Moldovan soccer club, [ZeroHedge reported](#).

Adama Traore, 26, a winger for Sherriff Tiraspol, was seen clutching his chest as he slumped to the ground in the middle of the game as medics rushed to revive him. The reasons behind Traore's collapse and why he was suffering from chest pains have not been confirmed.

Traore's collapse occurred the night after another player, Sheffield United's John Fleck, went down during a match against Reading. Fleck was taken off on a stretcher after receiving lengthy treatment.

When a radio pundit questioned whether Fleck had [received the COVID vaccine](#), his live feed to the show was cut.

A major German newspaper, [Berliner Zeitung](#), recently published a report attempting to answer why an “unusually large number of professional and amateur soccer players have collapsed recently.”

The article listed many recent cases of players who experienced heart problems or collapsed on the field — in some cases resulting in death.

Pfizer seeks authorization for boosters shots for 16- and 17-year-olds

Pfizer CEO Albert Bourla [said in a tweet](#) on Tuesday the pharma giant, along with BioNTech, formally asked the FDA to authorize COVID booster doses for 16- and 17-year olds.

If approved, the shot would be the first booster available to people under 18.

The FDA could approve [Pfizer's booster doses](#) for 16- and 17-year olds as soon as next week, according to people familiar with the matter.

COVID vaccines may be associated with heightened risk of myopericarditis among men

To help determine whether a [correlation exists](#) between COVID vaccines and myopericarditis, researchers tracked data from more than 268,000 adults in Massachusetts who received at least one dose of a COVID vaccine between August 2020 and May 2021.

The researchers compared the data to a control group made up of 235,000 of the same patients — from 2018 and 2019, well before they had received any doses of a COVID vaccine.

In a study [published](#) in the American Journal of Cardiology, the researchers found the age-adjusted incidence rate of myopericarditis in men was higher in the vaccinated than the control population, while the incidence rate of myopericarditis in women was the same between the vaccinated and control populations.

They also found an increased incidence of myocardial injury in both men and women in 2021 compared to 2019, although they suggested some of the apparent increase in the diagnosis of myopericarditis after vaccination may be attributable to factors unrelated to the COVID vaccines.

Urgent: 3 Ways to Help Stop Biden's Vaccine Mandates

Moderna CEO says Omicron COVID booster could be ready by March

Moderna President Stephen Hoge said Wednesday boosters of its COVID vaccine targeting the [Omicron variant](#) could be ready for U.S. authorization as early as March.

Moderna is also developing a multivalent vaccine targeting Omicron and three other COVID variants, although the shot will not be available for several more months, [Forbes reported](#).

March is the earliest date an Omicron booster could be approved under current FDA guidelines, though the company can start manufacturing the vaccine during testing.

Hoge said he thinks existing vaccines “will be able to slow down, if not completely stop, the Omicron variant.”

Children's Health Defense asks anyone who has experienced an adverse reaction, to any vaccine, to file a report following [these three steps](#).

Trying the cope with the heartache at what is going on. Too much empathy can be detrimental if logic fails to kick in. A colleague said today "how great that the kids can now get the vaccines". I felt horrified at this comment and deeply sad.

80 ^ | v • Reply • Share ›

Therese → Caren Liebman • 13 days ago

On a Facebook post recently, I had responded with the VAERS data of deaths and injuries. Someone replied to my comment saying that a few deaths from the vaccine are not as bad as all the deaths from covid-19🙄. The blindness is frightening.

55 ^ | v • Reply • Share ›

Charlene Kate Kavanagh → Therese • 13 days ago • edited

That's not even true. Vaccine deaths exceeded Covid deaths months ago. And they are more than 20 years of all deaths with previous vaccines. And the numbers are based on comparing to the official deaths when CDC documents reveal that only 6% of the number that is out there were deaths caused by Covid, whatever it is, alone. Most deaths from Covid are in frail elderly with comorbidities in nursing homes, not young adults and children.

I don't understand why people don't ask why despite all this, it's being pushed on younger and younger children. They're not at risk and they don't transmit. AND there are therapeutics that prevent deaths 100% when used early or as preventative.

35 ^ | v • Reply • Share ›

rose → Charlene Kate Kavanagh • 12 days ago

The elderly were killed by the treatment protocol, contamination of tests, withholding of care, cocktails of respiratory suppressant, and denial of care as documented here

<https://www.unite4truth.com...>

The entire testing program is medical fraud and review of the government's own data show the testing is unsuitable for detection of Sars CoV2

<https://www.unite4truth.com...>

The test CREATE the cases not infections.

And, the 'virus' is a computer modeled construct, not established to exist

Aptly and succinctly put, Rose.. Hear, hear.
Well done. ^^

I would (as would many others) like to see the NEW "moronic" variant, side by side under the microscope, compared to the "others".. we've been told to fear, but alas.. they've never necc isolated one, have they.. ?

How do you test for all of this?

You don't.

More children will die from the Vaccine than the disease!

9 ^ | v • Reply • Share ›

Barbara Colson → Therese • 11 days ago

We can't trust the data about deaths due to vaccine vs. deaths due to virus because its manipulated. A person classified as death due to covid the disease is anyone who dies before 14 days after their second dose of the vaccine and then

again 90days after their second dose until they receive a booster and the cycle starts all over again. Unfortunately, for those who choose to trust without checking the real science, can be mislead.

All of us must work day and night to disseminate the facts to parents. Even the so-called health authorities like the CDC and FDA acknowledge that children have virtually zero risk from this illness. Accordingly, there is simply no way to justify injecting them with a high risk, experimental, gene therapy. This level of depraved indifference is murder.

9 ^ | v • Reply • Share ›

I personally have now heard of direct evidence of 8 people who dropped DEAD within hours/days of Covid "vaccines" aka "Experimental Gene-altering Bio-chemical Injection"...VAERS reports 1% on a good day...I personally know of 8 young men who had Heart Attacks, 8 young women who miscarried...and just heard from the Director of our local Life Center (pro-life center to help support pregnant women)..when vaccines came out, in that month they had 30 appointments scheduled and ALL but 8 women cancelled their appointments- 7 out of 8 miscarried Dead babies! All of them told the Center they had been coerced to take the Covid "vaccine" to "protect themselves"....now I have heard of 15 women who miscarried Dead Babies post vax:(

STOP THE MADNESS!

33 ^ | v • Reply • Share ›

Kim from Brooklyn → FreedomFighter • 13 days ago

These jabs were not approved for humans. Lab animals died during experiments. Particles/contaminants are found in all the jabs, containing bits and pieces of sharp metal. Parasites have been found in these jabs. They should never have been injected in the millions.

Deaths and illness have just begun. It will get worse.

They need to be held accountable and charged with murder.

27 ^ | v • Reply • Share ›

I know of two involving my workplace within the past 3 months-- the latest this past week. Another additional two - (elderly parents of a coworker) had spinal problems weeks after their stabs, which they both got at the same time. They both developed tumors at the base of their spines. The husband had radiation on his I believe, but the wife had surgery and now is at a Rehab home "recovering" from sepsis that developed in the hospital during surgery.. The husband still needs a walker but the wife is now in a wheelchair. Prior to the vaccine, they both walked fine.

Regarding the other two- One was a husband of a female coworker who recovered from COVID months ago, but got the two stabs this Summer. His shortness of breath never went away since then, and feeling very fatigued with shortness of breath in late August, he passed away on his recliner at home. He was in his 50's.

The latest is a coworker who had a history of vein issues in his legs, which had gotten surgery for and was doing much better and back to work. After his booster shot this month he began having chest pains. Someone convinced him to go to his doctor's and he was admitted to the hospital. He died last Monday from a heart attack in the hospital. The medical establishment and Pharma can use every excuse in the book to support the vaccines and get every citizen in every country stabbed, but anxiety and stress over having a vaccine, etc., don't immediately cause cancer polyps at the bases of spines, _____
