

BAKUNA BUBBLE IMPLODES?

BUSINESSES AFFECTED BY COVID 19 SURGE

Multiple industries, businesses hampered by the **breakthrough** surge at the start of the year

The current surge in different industries are causing "health emergencies of breakthrough cases" and further crippling businesses. The recent issuance of **City Ordinances** in response to **MMDA RESOLUTION NO. 22-01 Series of 2022** urging the NCR Mayors to further restrict the unvaccinated and imprison violators will not solve the current crisis; it will only further damage the already volatile social and economic situation in our nation. The resolution, which perpetuates a culture of hate and division, will result in an oppressive environment and hinder any hope for economic growth.
