Fresh off a 7-day suspension from Twitter, BlackRock Whistleblower, Ed Dowd is back, with a horrifying report on Steve Bannon's War Room.

That article says:

“And the money chart is really Chart 4, which shows that the Millennial age group, 25 to 44 experienced an **84% increase in excess mortality into the fall**. It's the worst-ever excess mortality, I think, in history.

I called Ed to clarify where he got the chart and then looked for verification of this.

I found the verification.

Then I verified that the deaths couldn't be explained by the COVID delta variant.

OK, so what caused all the deaths? The only explanation is the vaccine because the deaths are so massive.

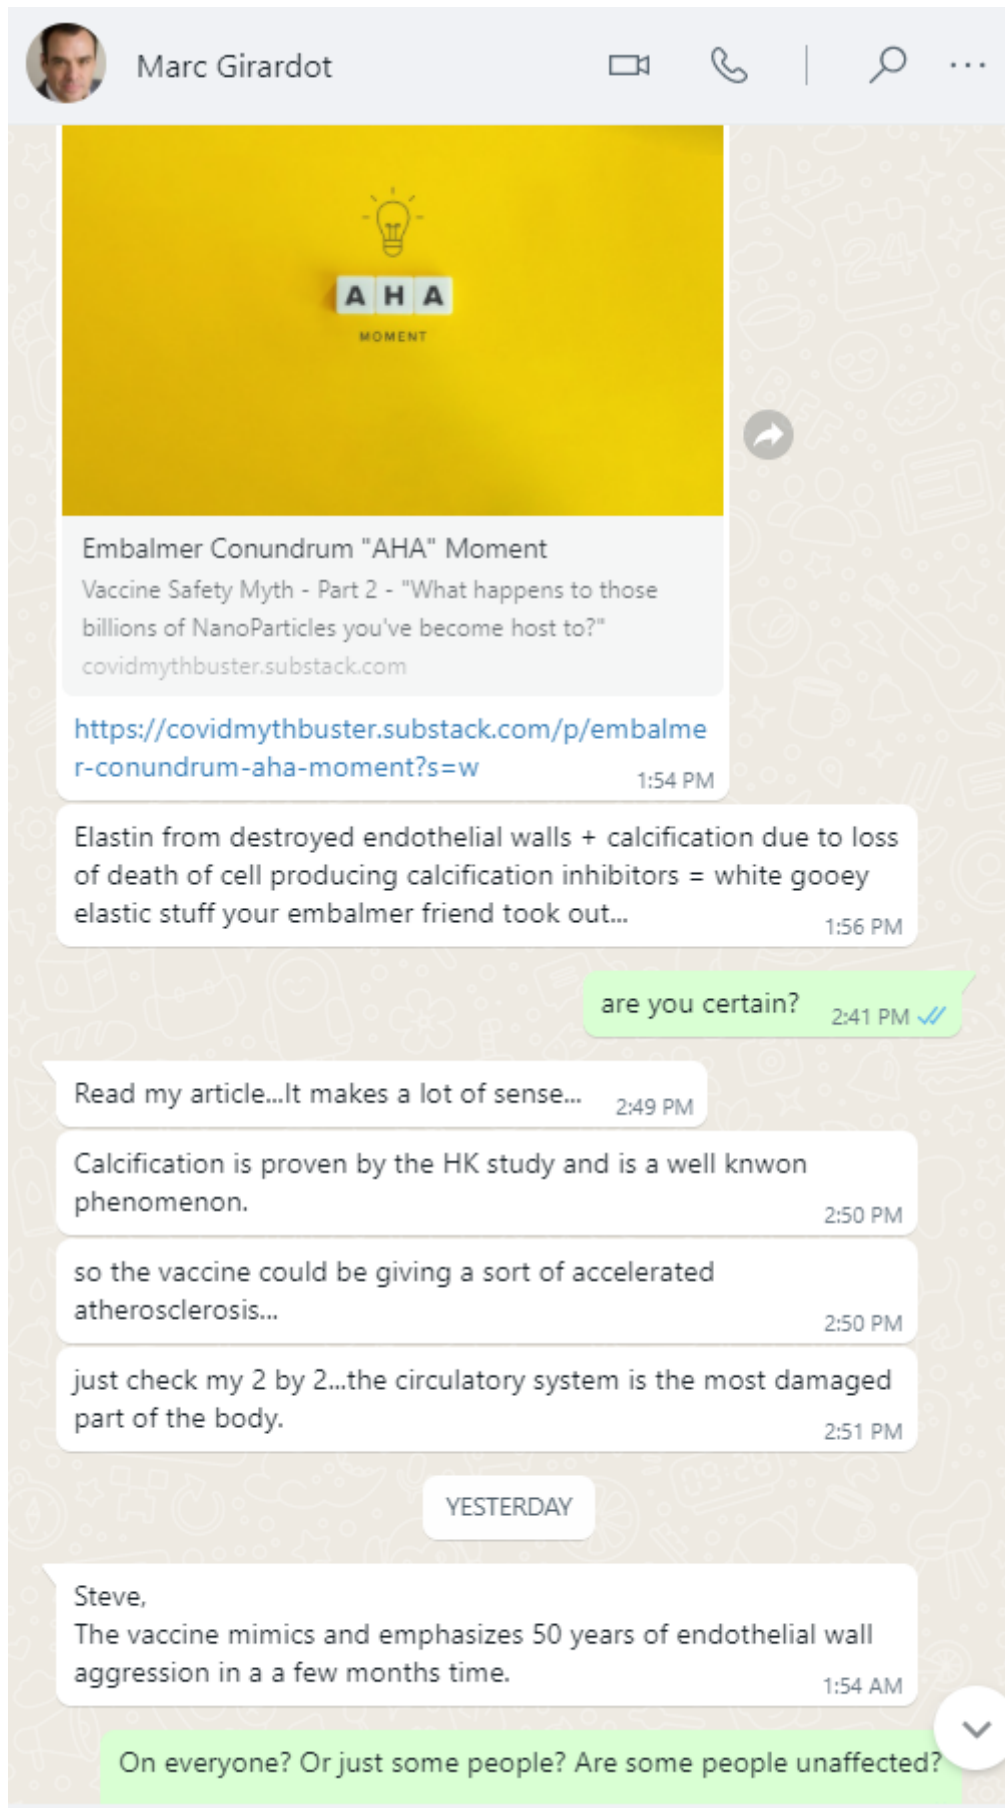

Background plausibility

First, the most important thing is plausibility.

I've written extensively about the safety concerns with the COVID vaccines.

Here are five recent data points that are consistent with the vaccines being unsafe:

1. Dr. John Campbell gets red-pilled as he walks his audience through the Pfizer "safety" data.
2. San Jose police officer, DeJon Packer, 24, passes away (presumably) in his sleep. Healthy 24-year-olds virtually never die in their sleep. This is the new normal since the vaccines rolled out. The coroner will find nothing because they never suspect the vaccine caused it. So they never look for telltale signs. Your doctor will say that this is bad luck, but way too many people are having bad luck lately, haven't you noticed?
3. Strokes are hitting young people like never before.
4. In this video, I interview Ryan Cole on his analysis of clots extracted by embalmers from people who have died. His conclusion: the clots played a major role in killing these people and were caused by the vaccine. These clots are seen in up to 93% of people who die (from all causes).
5. Here's a conversation I had on WhatsApp with Marc Girardot. He believes that the vaccine can, in some people, **age your arteries by around 50 years in a few months**. This of course would accelerate death. Here's an excerpt of our conversation:

Consider this tweet. If the vaccines are so safe, how do you explain this?

 **das.adam.the.introvert**
@Conspiracytrad1

I am leaving my job at the heart hospital.

I helped in a time when they needed physicians, but I'll say this very clearly

The vaccine is causing havoc in cardiac care.

The data justifying Ed's remarks on the excess deaths

Now let's go over some of the details of what Ed Dowd found and explain why there is no other explanation.

1. Ed's friend (who I know but doesn't want to be disclosed publicly) spent about a week analyzing the CDC data. The graph in the article is from the CDC data, but is plotted by Ed's friend. He didn't make anything up.
2. The work was replicated independently (see also the graphs).
3. US mortality graphs show a spike in the same time period (Aug to Oct).

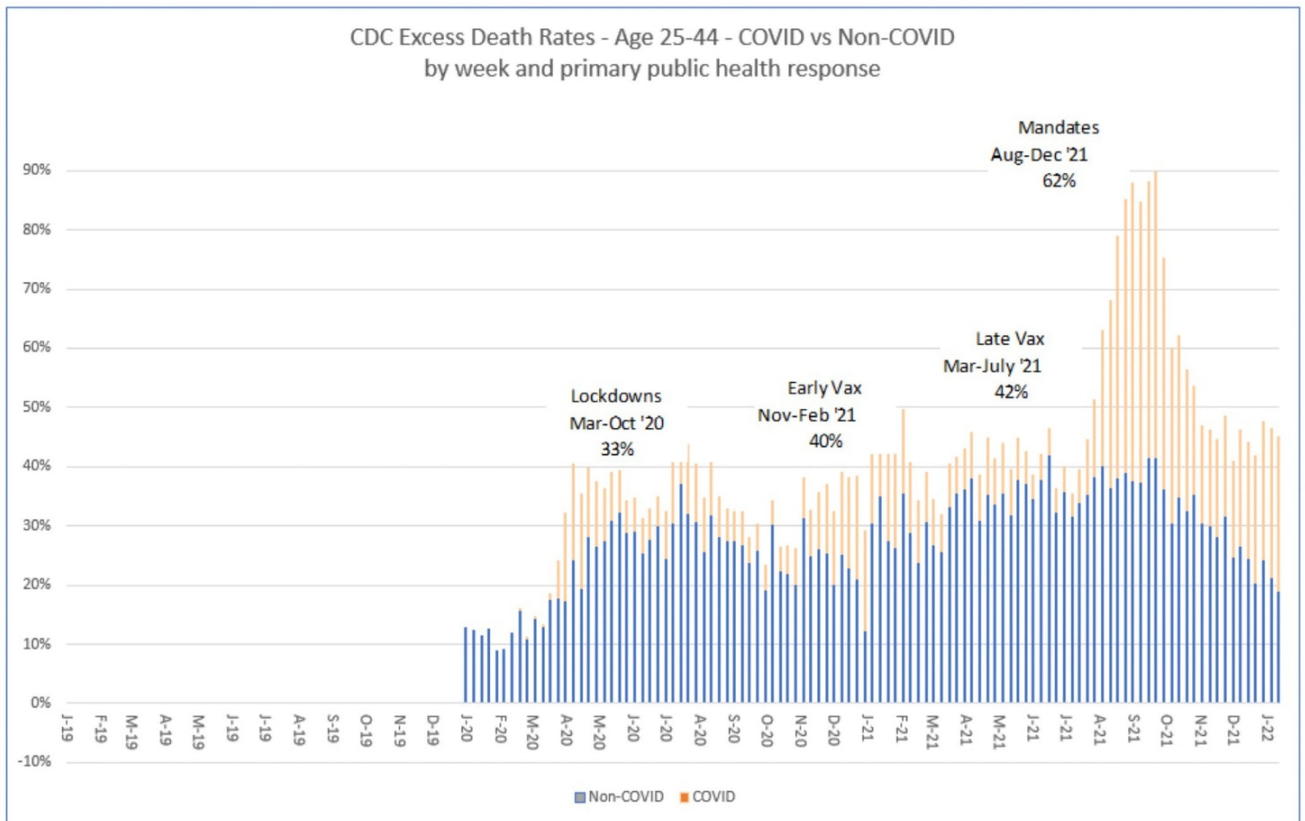

4. These graphs of excess mortality in Europe show things got worse, not better after the vaccine rollout:

Ed Dowd: "Millennial age group, 25 to 44 experienced an 84% increase in excess mortality"

5. The following image (a stacked bar of COVID and other excess deaths) that was created by MiloMac is hard for anyone to explain because the deaths went up when the booster/vax mandates were put in place:

Although the greatest contributor to deaths 25-44 is “COVID,” that makes no sense because the delta wave started in June, 2021 and nothing happened to COVID deaths during that time. If any virus is going to kill massive numbers of people, it would be the highly contagious and hard to treat Delta variant. Yet no significant change in excess deaths from COVID. All the excess deaths peaked in August right after the mandates.

Summary

If the huge spike in excess deaths starting in August wasn't due to the vaccine, what caused it? It couldn't have been COVID. And why isn't the CDC saying anything?

Surely, these are great questions that I'd encourage everyone to ask of their blue-pilled friends. Please, let me know what they say in the comments. We'd all love to know what caused this.

I'm sure the mainstream medical community knows the cause. I wonder why they don't tell us?

The new substack app bypasses email censorship

You can now read Steve Kirsch's newsletter (and all your other substack newsletters) in the new Substack app for iPhone.

And we have yet to see the long term deaths. I am seeing cancer cases popping up everywhere, as well as continued deaths from clotting. The cancer cases are strange- metastatic tumors but can't find the primary. Cancer cells in early stages that come and honor cannot be readily identified. I know so many people getting very strange diagnoses.

Bombshell findings, which should be breaking news all around the world, but nothing on the msm! I dont know what is more shocking the mass murder or the silence about this scandal by the msm and elites worldwide.
