BREAKING NEWS

## New Zealand's Pandemic of the Fully Vaccinated | Up to 100% of Covid-19 Hospitalisations are among the Fully Vaccinated according to official data

BY THE EXPOSÉ ON FEBRUARY 18, 2022 • ( 35 COMMENTS )

Listen Now

Official data hidden within News Reports published by the New Zealand Ministry of Health has revealed that the fully vaccinated population account for the vast majority of Covid-19 hospitalisations in New Zealand, with some days seeing the triple/double jabbed account for 100% of people admitted to hospital.

On the 16th Feb 22 the New Zealand Ministry of Health published a News Report containing information on Covid-19 Hospitalisations by vaccination status. In it they confirmed that of the current hospitalisations among the Northern Region, the unvaccinated population accounted for 2 hospitalisations, whilst the fully vaccinated accounted for 23 hospitalisations.

## Hospitalisations

- Cases in hospital: Total Number 56: North Shore: 6; Middlemore: 17; Auckland: 24; Rotorua: 1; Tauranga: 3; Waikato: 3; Wellington: 1, Christchurch: 1.
- Average age of current hospitalisations: 65
- Cases in ICU or HDU: 0
- Vaccination status of current hospitalisations (Northern Region only, excluding Emergency Departments):  
Unvaccinated or not eligible (2 cases / 5%); partially immunised <7 days from second dose or have only received one dose (N/A cases / 0%); fully vaccinated at least 7 days before being reported as a case (23 cases / 57.5%); unknown (15 cases / 37.5%).

So we took a look back at previous news reports published by the New Zealand Ministry of Health to paint a picture on the current alleged Covid-19 pandemic sweeping the country.

**These are the reports we analysed, dating back to 25th Jan 22 –**

The following chart shows the total number of Covid-19 hospitalisations by vaccination status each day in New Zealand between 25th Jan 22 and 16th Feb 22 –

Would love your thoughts, please comment.

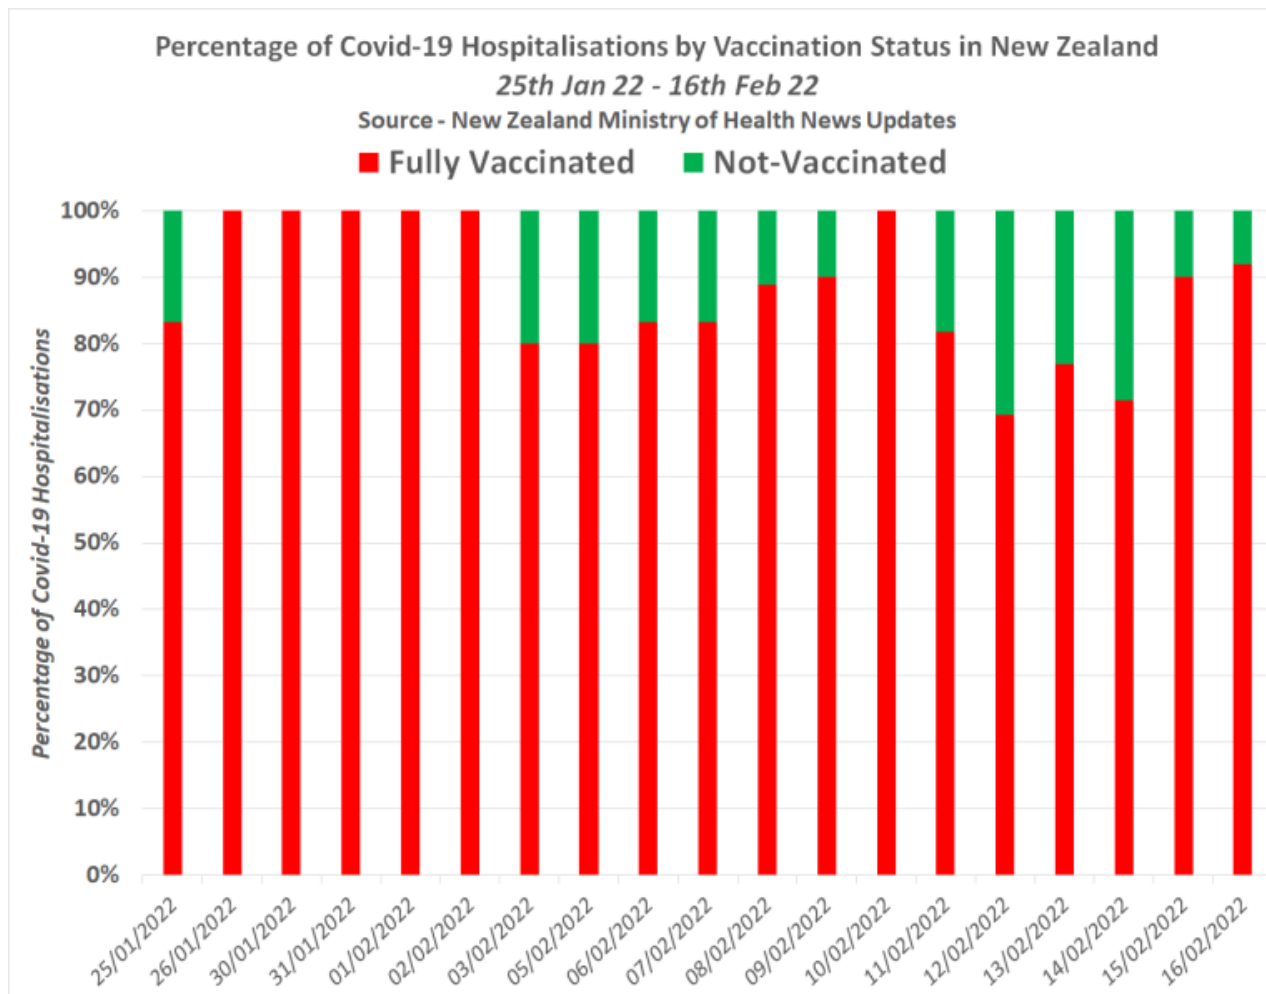

x

As you can see, every single day has seen the fully vaccinated account for the vast majority of Covid-19 hospitalisations, and as of the 16th Feb 22 things look like they are getting progressively worse for the fully vaccinated but improving for the unvaccinated.

On the 25th Jan 22 just 6 people were hospitalised with Covid-19, with the fully vaccinated accounting for 5 hospitalisations, and the unvaccinated accounting for 1 hospitalisation. On the 16th Feb 22 things look like they are getting progressively worse for the fully vaccinated but improving for the unvaccinated. On the 16th Feb 22 things look like they are getting progressively worse for the fully vaccinated but improving for the unvaccinated. On the 16th Feb 22 things look like they are getting progressively worse for the fully vaccinated but improving for the unvaccinated.

The following chart shows the percentage of Covid-19 hospitalisations by vaccination status in New Zealand between 25th Jan 22 and 16th Feb 22 –

Six of the 19 days have seen the fully vaccinated account for 100% of Covid-19 hospitalisations, this is despite approximately 79% of the New Zealand population being considered fully vaccinated.

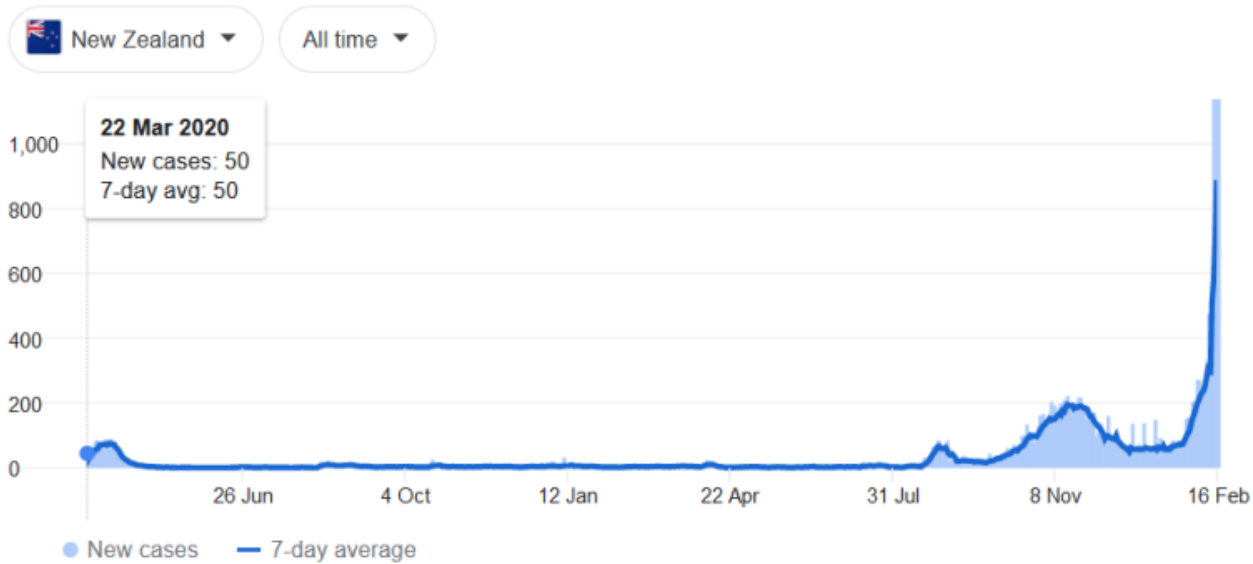

The most recent 2 days of data has seen the fully vaccinated account for 90% of hospitalisations on the 15th Feb and 92% of hospitalisations on the 16th Feb.

Would love your thoughts, please comment. x

The New Zealand ministry of health has refused to publish the number of Covid-19 deaths by vaccination status, but we think it's plain to see by the very limited data they have quietly published on Covid-19 hospitalisations, that the country is very much in the midst of a Pandemic of the Fully Vaccinated, and it looks like Covid-19 vaccination has offered zero benefit in preventing hospitalisation.

In fact, from the numbers given it appears vaccination has made things worse.

And the “not vaccinated” are the people who have had their vaccines, but are waiting 14 days before being declared vaccinated – vaccination now occurring every 12 weeks or so.

exiled off mainstreet

🕒 13 days ago

We know that the horse-faced empress has gone over to the dark side and is making war on the population who foolishly re-elected her despite indications already present that she was a mad, nero-like enemy of the people.

Nice article, but the headline is misleading. If you are going to say that 92% (23 out of 25) is “up to 100%”, well you could also say that for 73% or 27% couldn't you. Any percentage falls under “up to 100%”. Smells a bit clickbait-ish and you're not doing yourselves any favors doing that 😊

Parasites found in so called vaccines. Mind control by parasites is real, and thus their opposition to ivermectin. Ever heard of toxoplasmosis? It is a parasite found in cat feces that causes

women to become “crazy cat ladies” so they collect many cats thus, reproducing itself. This parasite takes control of grasshoppers and makes them commit suicide. Why do you think the homosexual lifestyle is so encouraged? I sincerely believe there is a lot of demonic forces at play in our government. One only has to open their eyes, pay attention and ask God for discernment. I did a parasite cleanse thanks to ivermectin and let's just say it was successful. Get your ivermectin before it is too late [ivmpharmacy.com](http://ivmpharmacy.com)

It's not different in NZ to other parts of the world where after high levels of what is called vaccination – though it is actually gene therapy – makes things worse! And according to Vaxcinda, we should all 'be kind' and get vaccinated!

[...] This brings us to the last common denominator, that keeps rearing its ugly head at every point and development within the last 2 years of protracted Pandemic emergency measures. Toted as first the cure that would bring herd immunity, a science that has also since been first changed, then modified in its new defining even and now has been outright dropped while being labelled as 'misinformation' along with the remainder of the old and established science. Then repackaged and marketed as a booster of the bodies immune system that would require regular 'upgrades', as the stats that could not be hidden are showing that the 'inoculated' are still contracting COVID-19.
