

DEATHVAX™ Update: All Cause Mortality & The Pull Forward Effect

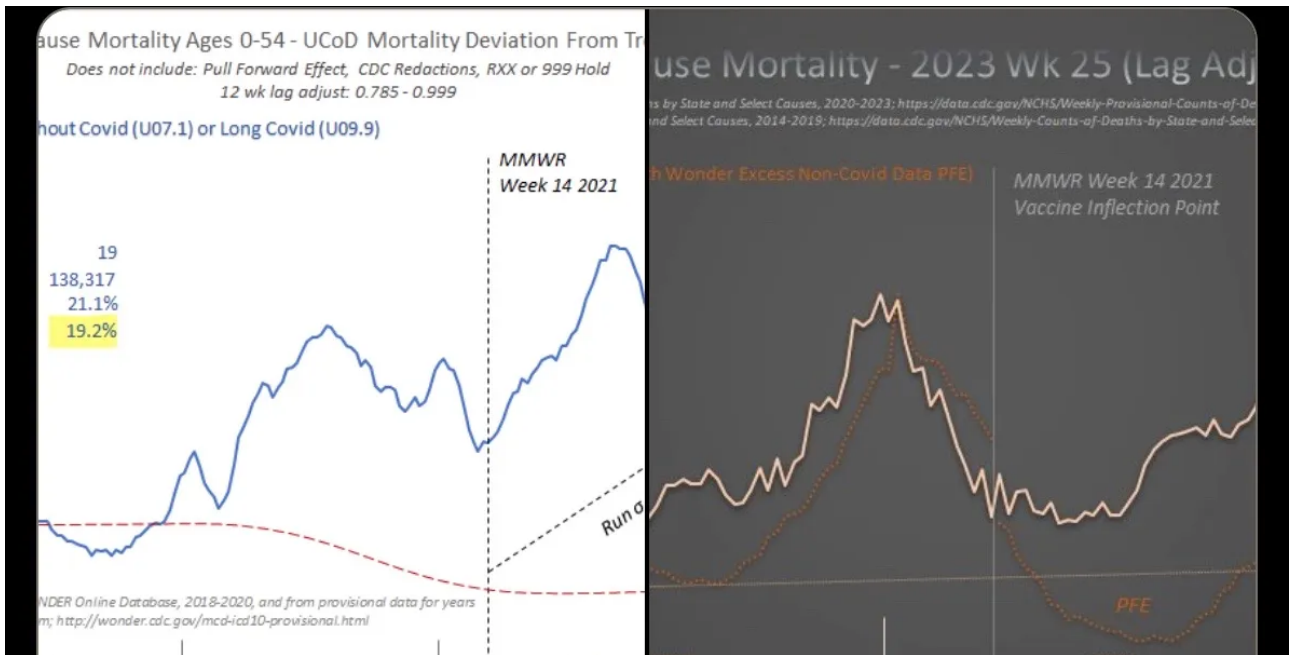

2ND SMARTEST GUY IN THE WORLD
SEP 8, 2023

This Substack has been diligently tracking the grim post slow kill bioweapon rollout trends:

From Turbo Cancer to Sudden Cardiac Mortality to Excess Non-Covid Natural Cause Mortality: The Never-Ending Adverse Events of the "Vaccinated" & The Global Depopulation Program

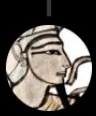

2ND SMARTEST GUY IN THE WORLD · JUL 9

Yesterday this Substack reviewed the latest cardiac mortality data: A few days before that, this Substack reviewed the latest cancer data: Today we tie these terrifying trends together by reviewing the latest data on excess non-PSYOP-19 natural cause mortality:

[Read full story →](#)

Let us now review the latest data, and what the implications will be:

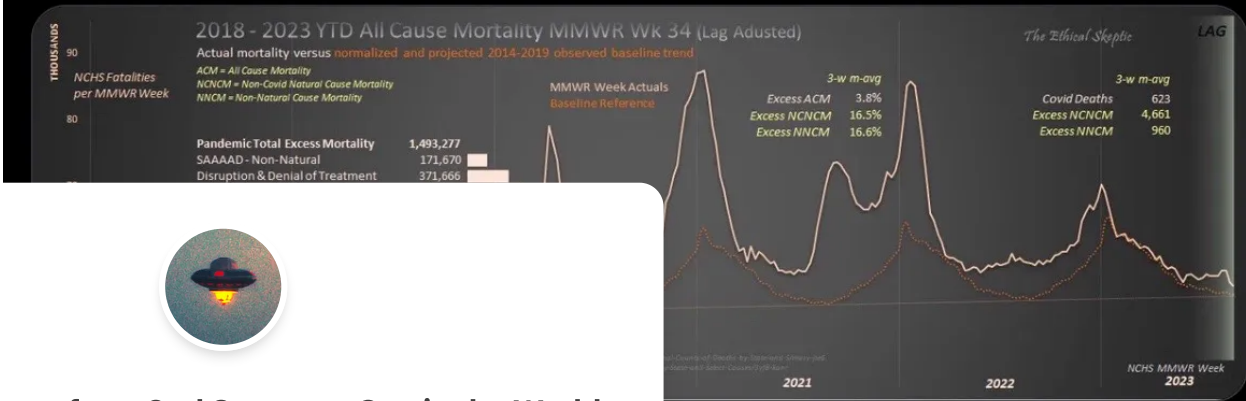

Ethical Skeptic 
@EthicalSkeptic

And with regard to those who live by the sword of touting All Cause Mortality, you shall die by that same sword as well.

In the coming two years, Pull Forward Effect will exhaust, and you no longer will be able to use that sleight-of-hand trick to fool people.

We bear the skills. We will be watching.

Ethical Skeptic @EthicalSkeptic

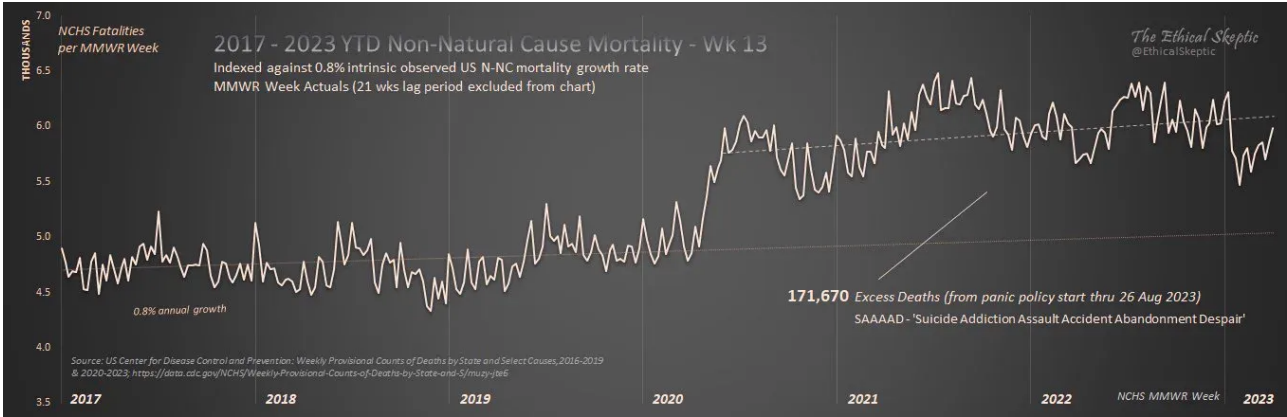

What the CDC is doing, is methodically transferring Excess Non-Covid Natural Cause Deaths (left) into the Non-Natural Deaths grouping (weeks -7 thru -18), imparting natural seasonality into a non-natural statistic (right) which never existed in that set before.

We track both, so that this excess cannot be hidden.

2:20 PM · Sep 7, 2023 · 7,467 Views

The charts from the above reveal the Center for Disease Crime’s (CDC) weak sleight of hand:

Unrelenting DEATHVAX™-induced death and disease eclipses any “pandemic” trends, and we have only just begun:

Ethical Skeptic @EthicalSkeptic

Match to this, another 960 deaths from other than natural causes, and you have a

Echo Pandemic Week 34 2023 Excess Mortality = 6,260

Most weeks of the Covid pandemic were not this bad. And yet, this has no end in sight.

2:17 PM · Sep 7, 2023 · **3,398** Views

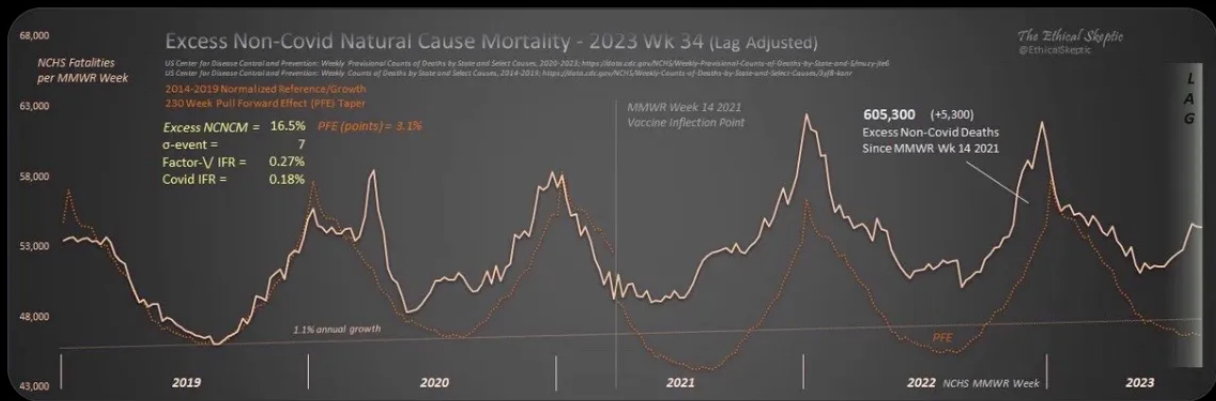

Ethical Skeptic @EthicalSkeptic

We added 5,300 more Excess Non-Covid Natural Cause Deaths to the rolls this last week (Week 34 of 2023).

What doctors and lay people are seeing in their practices and families, shows in the CDC data...

And yet, (telling) obfuscation from authority, troll, and media...

All of this is mirrored in the horrifying and surging (turbo) cancer data:

Ethical Skeptic 
@EthicalSkeptic

When Cancer Mortality surges 24% in younger ages, & is coupled with stark increase in less-common cancers, commensurate with a DROP in mortality for the BIG TWO cancers (Lung & Colon)...

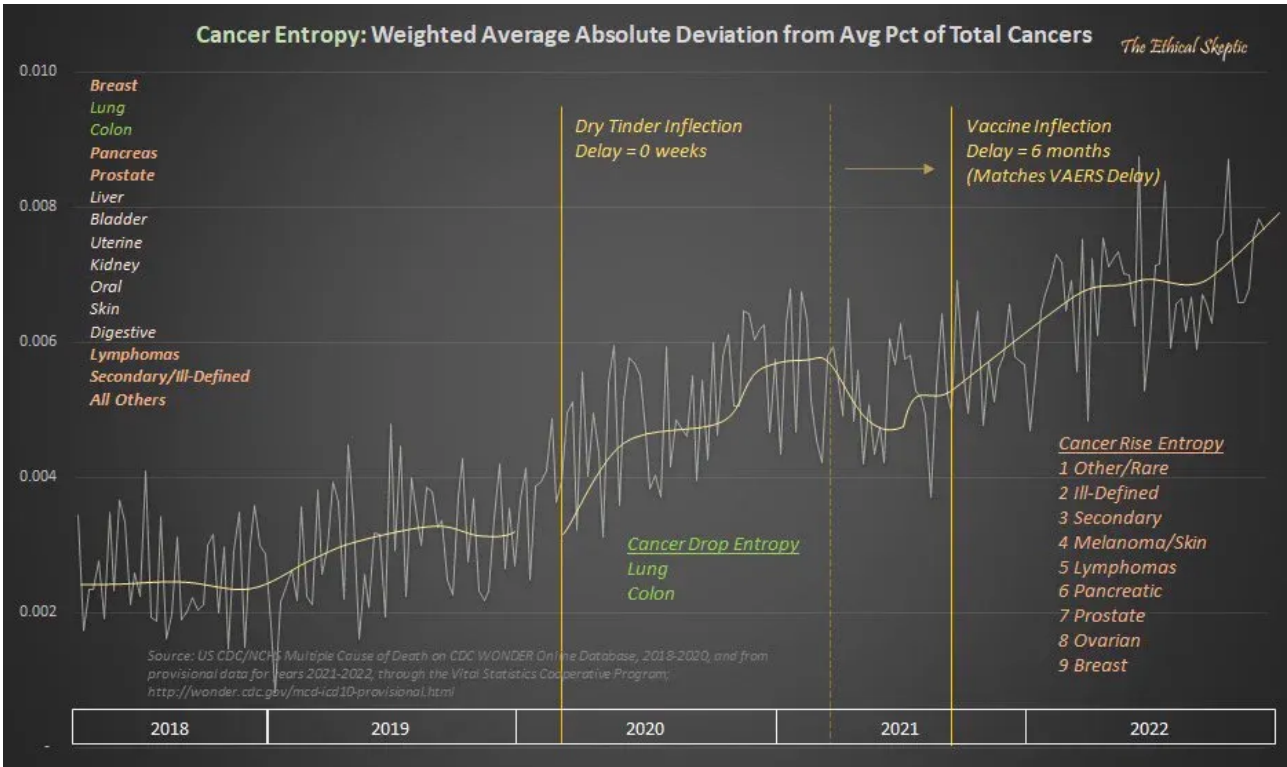

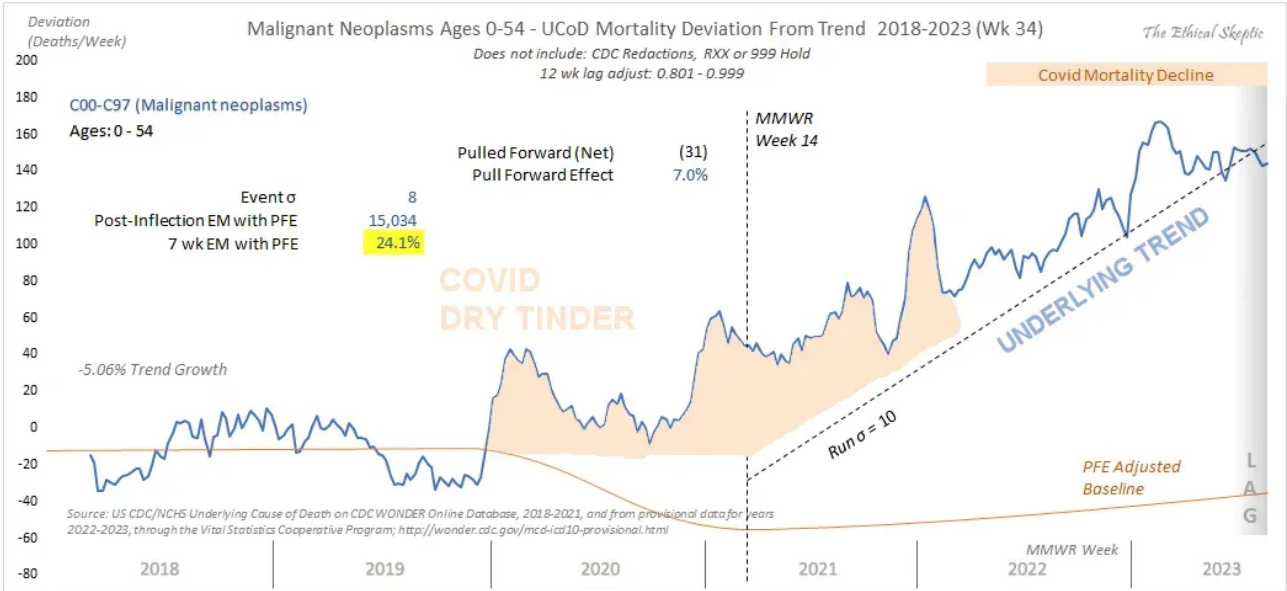

This is indicative of a toxin in the population, and NOT 'screening appointment' practices.

3:26 PM · Sep 6, 2023 · 207.4K Views

The charts from the above:

The trend is quite literally your mortal enemy.

And we have all been hearing of how the vaccinated genetically modified subjects sre looking sickly, drained of their life force, with signs of impaired cognition and perpetual states of lethargy (i.e. prion-based diseases and hyper-inflammation, or VAIDS):

Edward Dowd

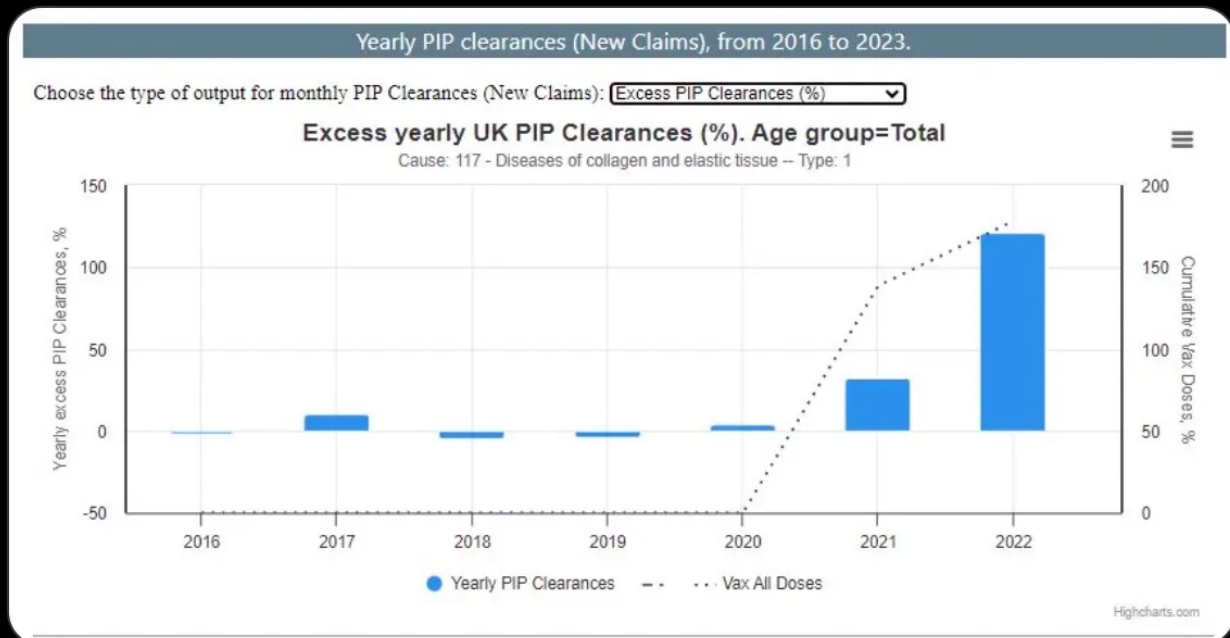

@DowdEdward

A signal for Diseases of collagen & elastic tissue are found in the UK PIP disability data. Excess claims in 2022 are up 121% from trend and 20 standard deviations.

Anecdotally people have been reporting a deterioration of loved ones vitally and appearance. 🙄

Just a treasure trove of data.

3:45 PM · Sep 6, 2023 · 107.9K Views

The “vaccinated” are degrading; in other words, the SP 2 (“vaccine” spike protein) is attacking the epidermis, and depleting collagen stores. This is absolutely shocking: it is like a slow-motion zombie transformation.

Expect to see a surge in the once rarer diseases like Ehlers Danlos Syndrome (EDS) and the like, to go along with turbo cancers, blood clots, prion-based diseases, etc.

Tying all of this together is a most troubling article in The Mirror UK entitled, [Experts issue urgent 'death' warning to anyone who has had Covid in the last two](#)

[years](#)

Following the UK's mass [vaccine](#) rollout, many Brits have a level of protection against the virus but now scientists in the US warn that those who have had the virus are at a higher risk of dying than those who have not. The new study, published in [Nature Medicine](#), discovered that as far as two years after infection people who were hospitalised with the virus have a greater chance of death.

In other words, those that received their “vaccines” and tested positive for “COVID” (i.e. VAIDS) are at higher risk of dying than the refuseniks.

The article continues its coverup:

For patients who weren't hospitalised by the killer virus, it takes just six months for the risk of death to no longer be significant, it added. But this doesn't mean they are spared some pretty nasty side effects. They could still be at risk of over 20 medical conditions such as cardiovascular issues and blood clotting trouble, diabetes, gastrointestinal problems and kidney disorders.

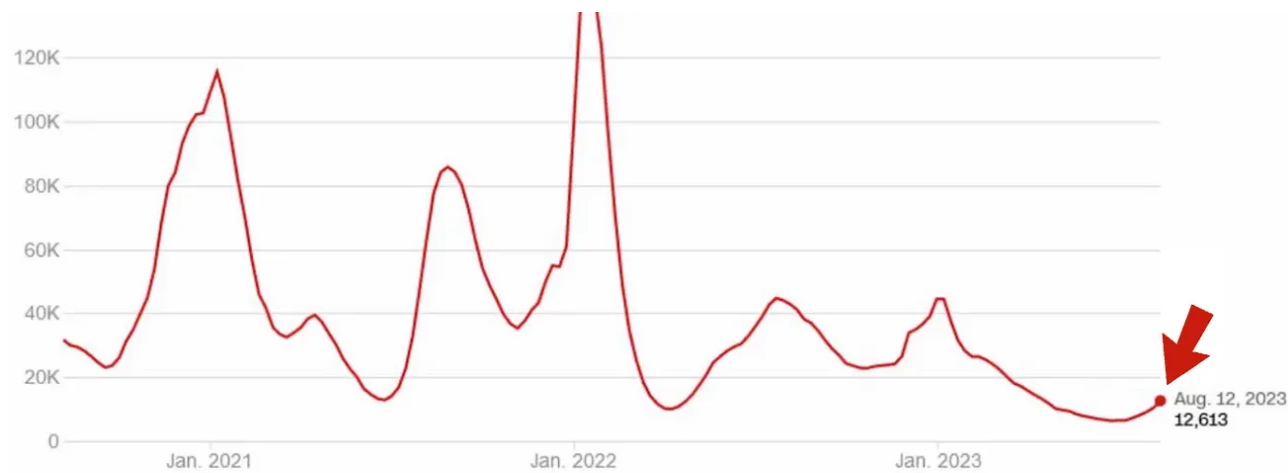

A “killer virus” with an IFR (infection fatality rate) identical to the seasonal flu is now being blamed for all of the “vaccine” side effects.

The study comes as a new Covid variant is causes an increase in cases. BA2.86 is a new strain of [Omicron](#), and comes shortly after the EG5.1, or 'Eris' variant. Eris currently accounts for around 15 per cent of all cases in the UK, according to UK Health Security data. Between August 6 and August 12, 6,289 people had a confirmed positive test result in England.

That “increase” in cases was previously exposed:

The Latest PSYOP-23 "Wave"

2ND SMARTEST GUY IN THE WORLD · AUG 25

Last updated August 21, 2023.

Note: Data updated weekly

Source: US Centers for Disease Control and Prevention

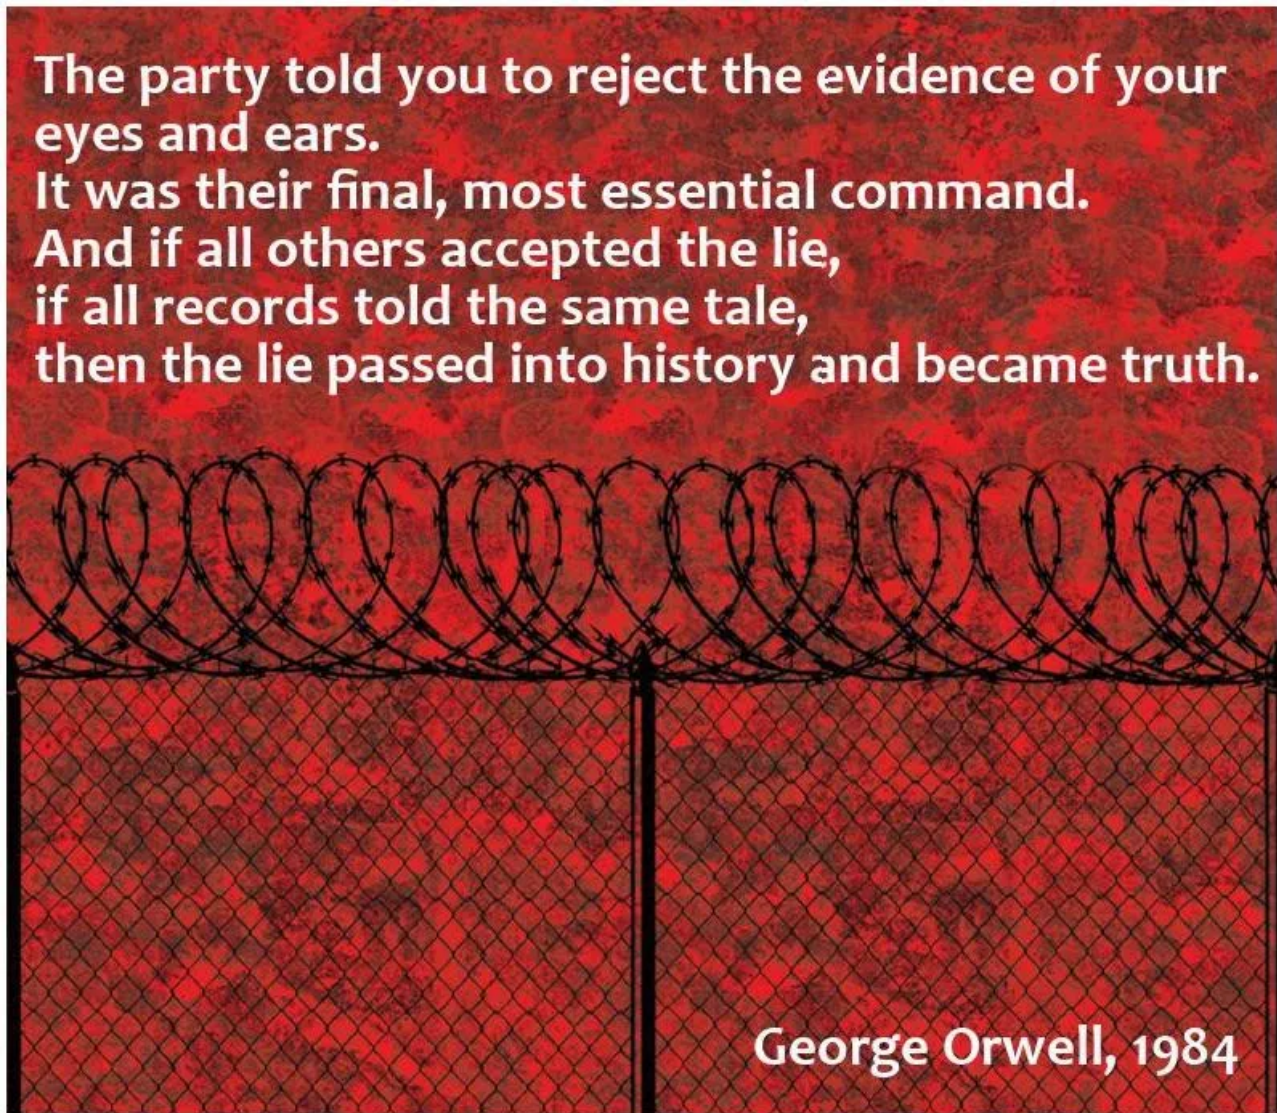

Readers of this Substack appreciate what is once again being planned for us: So what does this latest wave of death and destruction really look like? Mind you, this data comes courtesy of the Centers for Disease Crimes (CDC) using fraudulent PCR tests set well above 30 cycles; in other words, the democidal psychopaths are deploying their followup “pandemi...

[Read full story](#) →

These various One World Government assets are simply goosing the numbers with fraudulent PCR testing, and inane excuses:

This shows an increase of 17.4 per cent compared to the previous seven days. Experts have suggested this sudden surge in cases could be because of poor [weather](#) in July prompting people to gather indoors without ventilation to keep them safe.

Of course, blaming everything on PSYOP-CLIMATE-CHANGE is the ultimate gaslighting, and conflating weather with “pandemics” is just too easy now, especially as mortality, turbo cancer, and the whole gamut of other VAIDS symptoms are exploding in plain sight.

The problem that the Globalist Party now faces is The Pull Forward Effect, which means that over time their absurd obfuscations and “Trust the Science” claims all become exceedingly untenable in the face of increasingly irrefutable data; the trends are so bad that even a brainwashed and dumbed down populace will ultimately become incredulous, and possibly even violent.

Do NOT comply.
