

FDA Admits There's 'Zero Scientific Evidence' That 'Monkeypox Virus' Exists

By Frank Bergman • August 24, 2024 - 12:23 pm

Newly unsealed documents have revealed an explosive confession from the U.S. Food and Drug Administration (FDA) about the so-called "monkeypox virus."

The documents were obtained by investigative reporter [Christine Massey](#) from a Freedom of Information Act (FOIA) request.

According to one document [published](#) by Massey, the FDA admits that there is "zero scientific evidence" to prove that the "monkeypox virus" even exists.

The FDA has no records authored by anyone, anywhere to support claims of the virus's existence.

According to Massey, the FDA has no records that:

1. scientifically prove/provide evidence of the existence of any alleged "monkeypox virus", or
2. even describe the purification of particles that are alleged to be "monkeypox virus" directly from bodily fluid/tissue/excrement of so-called "hosts", or
3. describe the purported "genome" of any alleged "monkeypox virus" being found intact in the bodily fluid/tissue/excrement of a so-called "host" (as opposed to fabricated in silico, aka a computer model), or
4. scientifically demonstrate contagion of the illness/symptoms that are allegedly caused by purported "monkeypox viruses."

In the documents shared by Massey, Sarah B. Kotler, the FDA's Director of the Division of Freedom of Information, admits there are "no responsive records."

"The FDA does not regulate or treat viruses," Kotler wrote in the email.

"The FDA is responsible for protecting the public health by ensuring the safety, efficacy, and security of human and veterinary drugs, biological products, and medical devices; and by ensuring the safety of our nation's food supply, cosmetics, and products that emit radiation.

"Therefore, we have no responsive records."

Dear Requester,

I am writing in response to your request for:

All studies in the possession/custody/control of the FDA, authored by anyone, anywhere: 1. - that scientifically prove/provide evidence of the existence of any alleged "monkeypox virus" (showing that the alleged particles exist, invade and replicate in "host" cells and cause the illness/symptoms that they are alleged to cause). Note: Scientific proof/evidence is not opinions, speculation, declarations, review papers or descriptive studies. Scientific evidence requires use of the scientific method to test falsifiable hypotheses through valid, rigorous, repeatable controlled experiments. 2. - that describe the purification of particles that are alleged to be "monkeypox virus" directly from bodily fluid/tissue/excrement of so-called "hosts" (without adding any sources of genetic material or proteins), with purification confirmed via EM imaging (the images must be available as well). Purify = separate from everything else in the clinical sample. I am aware that according to "virus" dogma a "virus" requires host cells in order to replicate. I am not seeking records describing the replication of a "virus" without host cells or that describe a suspected "virus" floating in a vacuum or a strict fulfillment of Koch's Postulates. I am simply seeking records that describe purification (separation from everything else in the "host" sample). I am not seeking private patient records. 3. - wherein the purported "genome" of any alleged "monkeypox virus" was found intact in the bodily fluid/tissue/excrement of a "host" (as opposed to fabricated in silico, aka a computer model). 4. - that scientifically demonstrate contagion of the illness / symptoms that are allegedly caused by purported "monkeypox viruses". If any records match the above description and are publicly available, please provide enough information about each one so that I may identify and access it with certainty (i.e. title, author(s), date, journal, URL, DOI). Send via email.

The FDA does not regulate or treat viruses. The FDA is responsible for protecting the public health by ensuring the safety, efficacy, and security of human and veterinary drugs, biological products, and medical devices; and by ensuring the safety of our nation's food supply, cosmetics, and products that emit radiation. Therefore, we have no responsive records. If you are interested, we have already made information public regarding the milk supply (Updates on Highly Pathogenic Avian Influenza (HPAI) | FDA) and the process for approval of Avian Influenza test kits. (Influenza Diagnostic Tests | FDA).

In accordance with 45 CFR § 5.61 and 21 CFR § 20.41(b)(5), you have the right to appeal this

This is despite the fact that the FDA has just approved a new "vaccine" to "prevent monkeypox disease."

In addition, the FDA has issued "Emergency Use Authorizations" of "in vitro diagnostics... related to monkeypox" and provided "Information for Monkeypox Test Developers."

The confession emerged shortly after the World Health Organization declared the "monkeypox outbreak" a "public health emergency of international concern."

Meanwhile, the share prices of monkeypox vaccine makers have been skyrocketing on the news.

This news comes amid increasing warnings about the validity of the official claims about monkeypox.

As Slay News reported earlier, a renowned German doctor has spoken out to warn the public that the monkeypox “outbreak” is a hoax and the “symptoms” are actually side effects of Covid mRNA vaccines.

Dr. Wolfgang Wodarg issued the warning in a new whistleblowing interview with the Austrian outlet AUF1.

He explains that reports of a monkeypox “global emergency” from the WHO are part of a fearmongering campaign designed to scare the masses.

Wodarg asserts that globalists are seeking to cover up the negative health impact of Covid shots while trying to profit from testing and treating monkeypox.

“They’re scaring us again,” Wodarg said of the globalist medical establishment.

“It’s a business exploiting the effects of the corona shots they pushed on us.

“They’re using corona side-effects to create new schemes and scare us again.”

Alex Jones of Infowars [shared a clip](#) of the interview translated from German to English.

Jones says the video was from a German article titled:

“Doctor: Monkeypox is actually shingles, a side effect of the Covid vaccines.”
