

This Is “What the Depopulation Agenda Looks Like Today”

While that statement, applied to this graphic, is very accurate right now, this is actually a collage from *THRIVE: What On Earth Will It Take?*, which premiered 13 years ago in 2011. How did we know? — because we had already been studying the patterns of the little-recognized Global Domination Agenda

While that statement, applied to this graphic, is very accurate right now, this is actually a collage from [*THRIVE: What On Earth Will It Take?*](#), which premiered 13 years ago in 2011.

How did we know? — because we had already been studying the patterns of the little-recognized [Global Domination Agenda](#) for twenty years.

Let’s break it down a bit.

Hardly anyone with a pulse would argue that we’re not dealing with polluted water and toxic food. The GMOs and poisonous chemical pesticides, herbicides and fertilizers — especially glyphosate and neonicotinoids — have wreaked such havoc on health and eco-systems around the world that Monsanto had to sell out to Bayer (one of the original Nazi supporters) to survive. Do we really think that this was mere incompetence and greed?

If you control the food, you control a nation.
If you control the energy, you control a region.
If you control the money, you control the world.
— Henry Kissinger

The evidence is now more than ample that directed energy weapons (DEWs) like the HAARP antenna arrays and satellite-based lasers are being used to direct and enhance storms, start massive wildfires, and move the jet stream.

[My own research into chemtrails](#), and that of devoted researchers like [Clifford Carnicom](#), [Dane Wiggington](#), and [Elana Freeland](#) along with activist [Rennette Senum](#) have been exposing the nefarious atmospheric geo-engineering plots that have been concealed and denied since the late 1990s. When I was working in this area, I asked my world-class investigators to estimate what it would take to both get the necessary proof to shut these covert programs down, and to stay alive while doing it. Their estimated budget was \$2.3 million, and the Thrive movement did not have those resources at the time. Thankfully, now, RFK Jr. has

said publicly that he will take this project on as part of his health initiatives. I believe the proposed new EPA Director Lee Zeldin will be a real ally on this because of his prior work on getting rid of PFAs ("forever chemicals") and exposing the [Climate Change scam](#).

The radiation of our food, our devices and our airport screeners have now been vastly supplemented by 5G towers being installed everywhere. These are not only extremely toxic to the bodies of humans, mammals, birds, and insects, but they are also intended as both surveillance and behavior modification devices.

I've done countless blogs and videos on [man-made pandemics](#), as well as the toxic bio-weapon clot shots and global pandemic treaties that the faux plagues are actually created to empower. By conservative estimates, the global covert

[vaccine murders have exceeded 10 million people](#), and most of the world doesn't even recognize the danger yet... But that is all changing.

As destructive and lethal as all these depopulation tactics have been, they are now getting exposed and failing... Thank goodness. But now the cornered sociopaths and kleptocrats are so panicked at their imminent exposure, defeat, and prosecution, that they are leaning recklessly into the final option — *war*.

[Ukraine](#) and [Gaza](#), domino-ing into Syria and Iran, and maybe Taiwan.

I believe these too will fail as so many people — even in the cabinet of the new U.S. administration — are awakening and standing for truth and freedom.
